Rory O'Connor - Revised: Special Atlantic Regional Operations Committee (AROC) Meeting - Mushuau/GA's

From: Christopher McDonell
To: Behar, Joe; Booth, Tryna; Cary, Lindsay; Cowie, Nancy; Glynn-Conrad,...
Date: 12/15/2015
Time: 10:00 AM - 2:00 PM
Subject: Revised: Special Atlantic Regional Operations Committee (AROC) Meeting - Mushuau/GA's
Place: Kitpu Boardroom - Second Floor
CC: Belliveau, Denise; Johnson, Charron; Linkletter, Megan; MacDonald, Ke...
Attachments: Christopher McDonell.vcf

Good afternoon:

Please be advised that tomorrow's Mushuau meeting will be scheduled from 10:00 AM to 11:30 AM for the expanded AROC participants along with the Department of Justice and Health Canada.

Please note that the continuation of GA's will be scheduled after the Mushuau discussion starting at 11:30 AM until 2:00 PM for the regular AROC participants with a break for lunch.

Please find below the dial-in information:

Number to dial: 1-866-885-0884
Select 1 for French or 2 for English
Select 1 to participate in an audio conference
Enter the 4 digit conference passcode: [REDACTED]

Please find enclosed the agenda for the next expanded AROC discussion on Mushuau FN.

At 10 a.m., we will be meeting with HC and DOJ to discuss current issues/situations/scenarios of concern/opportunities of the Mushuau FN. This will lead into a holistic, strategic discussion and next steps (areas of focus, short, medium and long term goals). All meeting participants will be encouraged to contribute to the discussion. Questions or concerns can be directed to Neil.

Agenda

1. Opening Comments/Update since last meeting - Chris
2. Brief presentation of ICA Framework and summarized dashboard information - Don
3. Presentation of Issues / Concerns / Trends
 - ESDPP - Tom
 - LED - Belinda
 - FS - Karen
 - HC - Jennifer Taylor, Leslie Keays-White,
 - DOJ - Kim Duggan
4. Identify common themes and discuss strategic considerations.
5. Next steps.

Thanks,

Rory O'Connor - Agenda Items - Mushuau Innu First Nation - January 6 - 7, 2016

Hi Everyone,

As a follow up to the recent AROC meeting (15 Dec) I want to thank everyone for your contribution to the broader consultative process as it relates to our relationship with the Mushuau Innu community. It is clear from that discussion, that a broader more comprehensive and integrated approach is necessary to better assist the Mushuau Innu in achieving better outcomes. The next step is engaging with the community on the 6th and 7th of January in Halifax.

The meeting with Chief Rich and council will better our understanding of the health and safety issues as well as their challenges around other factors that limit their potential. Our root cause analysis discussion made it clear that there are many factors that are contributing to the challenges that this community is facing. To this end, I have asked Tom to build an agenda that is supportive of addressing the issues that are limiting the potential of the community. Tom needs your input in order to structure the agenda and determine what topics to include and who should attend the meeting. My expectation is that you put considerable thought into this challenge.

Please forward your agenda items and/or suggestions to Tom **by COB on Monday 21 December.**

Thank you.

Debra and Kim,

Please feel free to contribute. I will share the proposed agenda with you on the 22 or 23 of December.

Regards.

Rory O'Connor - Follow Up to Mushuau Meeting 6&7 Jan 16

From: Christopher McDonell
To: ATRegion
Date: 1/26/2016 1:58 PM
Subject: Follow Up to Mushuau Meeting 6&7 Jan 16
Attachments: Christopher McDonell.vcf

French text follows:

Hi everyone,

I wanted to share with you details about an exciting and extremely productive meeting that was held Jan 6 & 7 in Halifax with the Mushuau Innu First Nation and Health Canada. The main purpose of the meeting was to explore ways to better support the Mushuau Innu First Nation's vision and priorities.

The Chief and Council were joined by their legal, financial and other observers. Health Canada had five participants, among them Debra Keays-White and our Atlantic INAC team consisted of Rory, Tom, Steve, Barb, Mathieu and Catherine, along with Kim Duggan of DoJ.

We discussed a series of important topics ranging from housing, furnaces, fire protection and emergency management, fuel, healthcare, lands management and spent time discussing the Mushuau's priority of getting out of co-management as well as their health and safety concerns.

I can tell you that the discussions, although frank at times, were very respectful and constructive. It was clear to me that we all attended the meeting with the collective goal of making a difference.

This meeting was a clear example of an Integrated Community Approach in which we worked together to help each other better understand the default prevention and management policy. With the Chief leading the way, we worked with the community to develop the makings of an action plan which will support the community's vision and priorities.

I believe that for the Mushuau Innu First Nation, we have made a giant step forward to which I am thankful to all the participants.

Greatly appreciated everyone!

Chris

Bonjour à tous,

Je voulais partager avec vous quelques détails d'une réunion passionnante et extrêmement productive qui a eu lieu 6 & 7 Jan à Halifax avec la Première nation des Innus Mushuau et Santé Canada. Le but

de cette réunion était d'explorer les moyens afin de mieux soutenir la vision et les priorités de la Première nation des Innus Mushuau.

Le Chef et le conseil étaient accompagnés de leurs observateurs juridiques, financiers et autres. Santé Canada avait cinq participants, parmi eux Debra Keays-White. L'équipe d'AANC Atlantique était composée de Rory, Tom, Steve, Barb, Mathieu et Catherine, ainsi que Kim Duggan, du ministère de la Justice.

Nous avons discuté d'une série de sujets importants, comme le logement, les fournaises, la prévention des incendies et la gestion des situations d'urgences, le mazout, les soins de santé, la gestion du territoire, ainsi que leurs préoccupations en matière de santé et de sécurité. Nous avons également passé un certain temps à discuter de la priorité de la communauté de se sortir de la co-gestion.

Je peux vous dire que les discussions, bien que parfois très franches, étaient très respectueuses et constructives. Il était clair pour moi que nous assistions tous à la réunion avec l'objectif collectif de faire une différence.

Cette réunion était un exemple clair d'une approche communautaire intégrée dans laquelle nous avons travaillé ensemble, afin que tous puissent mieux comprendre la Politique de la prévention et gestion des manquements. En suivant le leadership du Chef, nous avons travaillé avec la communauté pour développer une ébauche du plan d'action qui saura soutenir la vision et les priorités communautaires.

Je crois que nous avons fait un pas de géant pour la Première nation des Innus Mushuau et pour ceci je suis reconnaissant de l'effort de tous les participants.

Merci à tous!

Chris

Rory O'Connor - Re: Update on Mushuau Innu from Bill Nye

From: Kriss Sarson
To: Dunne, Stephen; Glynn-Conrad, Rosemary; McDonell, Christopher
Date: 3/10/2016 10:51 AM
Subject: Re: Update on Mushuau Innu from Bill Nye
CC: Cary, Lindsay; Keagan, Tom; Levesque, Ronald; Nye, William; O'Connor...

Hello,

The Circuit rider has replaced the existing chlorine injection pumps and completed the necessary repairs to restore chlorination at the plant. They are monitoring the chlorine residuals and it is expected that by today the drinking water will meet disinfection requirements.

In order to remove Boil Water Advisory, two consecutive samples 24 hour apart has to be sent to the lab in Goosebay. The sampling is proposed to start next week. As such, the earliest the BWA can be removed would be next Friday pending no surprises.

On another note, the circuit rider and the water operator flew up to Mushuau together. Upon arriving in Mushuau, the Circuit Rider went to the water plant to assess and start repairs and managed to complete the work by the end of the second day. Unfortunately the water operator did not participate with the installation of the new chlorination equipment or the repairs. It is concerning that it does not appear that the Operator nor his Supervisor understand the importance of participating in this process. Food for thought as part of the ICA process.

Thanks,

Kriss

>>> Kriss Sarson 3/2/2016 4:26 PM >>>

As directed, the request has been made to the Circuit Rider and he will be on-site as soon as possible.

Kriss

>>> Stephen Dunne 3/2/2016 3:57 PM >>>

Thanks..subject to Chris M's conversation with the Chief, we will ask him to proceed. Will advise asap.

>>> Kriss Sarson 3/2/2016 3:54 PM >>>

The cost of trip is an expense that they already budget for and the cost of any supplies/equipment that could not be absorbed by the Circuit Program, we could likely address through their funding.

>>> Stephen Dunne 3/2/2016 3:51 PM >>>

Is this something we can pay for from O&M?

>>> Kriss Sarson 3/2/2016 3:44 PM >>>

I talked with the Circuit rider and he can be in the community with all the necessary equipment in 3 days factoring in the availability of flights and hotels.

>>> Kriss Sarson 3/2/2016 3:28 PM >>>

We could see if the Circuit rider could get it running. However depending on what the problem directly related to time. For example, best case is the pump only needs a re-build kit, the repair could be done in 2-3 days. If the pumps are toast and new ones required, could take a week.

I will ask the circuit rider if he can determine if they can provided any assistance in getting this resolved in a timely manner.

One last note, the Boil Water Advisory is a recommendation, not an order.

Kriss

>>> Stephen Dunne 3/2/2016 3:21 PM >>>
Lindsay/Kriss

In the absence of Water operators in the community should we consider locating a water plant operator or someone from the CRT to get the chlorination system functioning? Boiling water only adds a further strain on the grid demands.

Steve

>>> Lindsay Cary <lindsay.cary@aandc-aadnc.gc.ca> 3/2/2016 1:33 PM >>>

As an update, I spoke with Newfoundland and Labrador Fire and Emergency Services. The Emergency Services Officer, Mario Berthiaume, has advised that he will be available to go to the First Nation to coordinate emergency response if required. I also discussed the operational plan I forwarded last night with him and he agreed it is workable. We will discuss further this evening.

I spoke with Bill Ferguson at MIFN this morning. Bill is rounding up the fire chief, electrician and whatever members of Council he can find. We will discuss immediate steps this afternoon after he contacts me.

Additionally, the First Nation has requested a supply of drinking water for the elders and the school. We're waiting to get a number from the First Nation. This request will need to be coordinated with Mamu in mind.

Bill also suggested INAC draft a public service announcement to be broadcast over community radio after it is approved by Council.

As you know, there is a continued problem in the community with residents using kitchen ranges to heat their homes. During this period Bill suggested oil be delivered to these homes so residents will not use ranges for heat. Furnaces use considerably less electricity than ranges. This approach was discussed with Kriss Sarson.

We have made calls to Phil Clarke and the Cdn Red Cross. Messages were left with both and we are awaiting their response.

Lindsay, for Bill

Further to discussions with Chief Rich this morning the following is the draft agenda items for the meeting on April 25th in the Amherst Regional Office. There will be an opportunity to make further adjustments if required.

Meeting is set to start at 10:00 a.m.

1. Opening Comments

- Chief Gregory Rich
- Christopher McDonell, INAC
- William McGilivray, HC

2. Review of Minutes

- Amended Final Notes January 6 & 7, 2016
- February 24, 2016

3. General Assessment (GA)

- Presentation by INAC/HC

- Connections to GA and Action Plans
- Discussion for further roll out of the GA with MIFN Program Directors and Staff

4. Integrated Community Action Plan/Management Action Plan

- Updates from MIFN
- Feedback from INAC/HC

5. Band Manager Staffing Action

- Update from MIFN

6. Action Plan Implementation

- Monthly and Quarterly Meetings
- Financial Updates
- Quarterly Co-management meetings
- Working Group Meetings

7. Round Table

8. Next Steps/Next Meeting

Notes:

- Lunch will be provided.
- The expectation is that item 4 will be reviewed in more extensive detail in the afternoon session. The morning discussion on the ICAP/MAP is intended to cover the main point and priority areas.
- Please distribute the draft agenda to others as appropriate.

>>> Tom Keagan 4/12/2016 1:19 PM >>>
Good Afternoon Chief Rich

This is to confirm the meeting scheduled for **April 25, 2016** at the Regional Office of Indigenous and Northern Affairs Canada (INAC) in Amherst, NS. The meeting is scheduled to start at 10:00 a.m. and is expected to conclude by 4:00 p.m.

Participants will include INAC, Health Canada (HC) and the MIFN Council. I will ask you to confirm the other participants for MIFN at the earliest opportunity. INAC and HC will also confirm their participants asap.

Tentative Agenda: ICAP/MAP; GA; status updates on ICAP/MAP activities; others tbc. Suggest we set up a call to confirm the agenda and other logistics.

Please send in the Council approved/signed plan at the earliest opportunity.

Also, can you confirm the status of your staffing process for a new Band Manager?

Please distribute this to your other Councillors and officials as appropriate.

Thank you.

>>> Rory O'Connor 5/8/2017 9:20 AM >>>

Good morning Diane:

Rory has two questions in regards to the long term and short term drinking water advisories conference call scheduled with Lynda Clairmont at 2:00 p.m. this afternoon.

1. Any concerns in other communities (issues with water)? Tobique could be considered at high risk. There is a project but it was not funded. We've flagged to hq as a priority.
2. Short term advisories to be aware of? These are likely as a result of work going on in a system as a matter of maintenance or as a precautionary measure from an incident such as a flood. Potlotek is an example as a result of seasonal issues. Project also not approved but flagged as a priority.

It would be appreciated, if you could provide him with the answers before the call at 2 o'clock, but please note that this meeting might not go ahead with the flooding situation in HQ.

Thanks,

Denise Belliveau for/

To: O'Connor, Rory
Date: 5/8/2017 4:24 PM
Subject: Fwd: Mushuau & Sheshatshiu
CC: Keagan, Tom; McCallum, Erika
Attachments: Mushuau & Sheshatshiu

Hi Rory,
The attached file was modified to show only the 2 communities.

Phase 1: new construction:

- both submitted proposals for 3 2-plex units. For Mushuau, it's in addition to the multi-unit they were supposed to get last year.

Sheshatshiu: [REDACTED]

Mushuau: [REDACTED]

Phase 2: renovations/additions:

- both communities submitted their max per application [REDACTED]

Phase 3: Lot servicing, innovation and capacity.

- The deadline for proposals was May 5th. Only Sheshatshiu submitted [REDACTED] but the proposal has yet to be assessed against the PRF.
- Another check-in with both will tell us whether they are still intending to submit anything in the coming days.

Neither community requested additions, future lot servicing or innovation funding.

Di

Rory O'Connor - VOCM Innu Nation Upset at Feds...

From: Jennifer Taylor <jennifer.taylor@aandc.gc.ca>
To: Tryna.Booth@aandc-aadnc.gc.ca, Tom.Keagan@aandc-aadnc.gc.ca
Date: 5/12/2017 4:49 PM
Subject: VOCM Innu Nation Upset at Feds...

Innu Nations Upset At Feds For Announcing Same Funding Twice
May 12, 2017 | 1:17 pm Last Updated: May 12, 2017 | 4:41 pm

The Sheshatshiu Innu First Nation and Mushuau Innu First Nation have registered their disappointment and issued a clarification regarding a federal government spending announcement made back in February.

MP Yvonne Jones announced on February 11 that a total of 40 homes would be renovated in both Sheshatshiu and Natuashish this year.

In a release sent out today, the Innu First Nations say there was great excitement surrounding the announcement at the time, since it came on the heels of a previous \$1.3-million in funding announced in November.

They say it then took over three months to set up a teleconference with the department whereby the two groups were "properly" informed of the correct details, which amounted to a reannouncement of funding already received and not new funding, as was suggested.

Sheshatshiu Chief Eugene Hart and Natuashish Chief John Nui say they are very disappointed and are now in the position of having to explain the correction to their people.

There are 78 community members currently on the waiting list for housing in Natuashish alone in addition to extensive renovation needs.

Sent from my BlackBerry 10 smartphone on the Rogers network.

Rory O'Connor - Re: Mushuau Innu Fire Protection - Action Plan

From: Tom Keagan
To: Diane Wade; William Nye
Date: 6/1/2017 2:26 PM
Subject: Re: Mushuau Innu Fire Protection - Action Plan
CC: Christopher McDonnell; Kriss Sarson; Rory O'Connor; Rosemary Glynn-Conrad

Thanks for the update Bill. In discussions with Chriss and others it's critical to have this work completed asap. Chief Nui and Council are in St. John's for June 4-9. Kriss S is trying to get in for part of this during the week of June 12th. Are you able to get in at this time also with the other officials (NL and other professionals)? This would be preferred if the logistics can be sorted out.

Please let me know once confirmed. Thanks.

>>> William Nye 5/31/2017 2:51 PM >>>

Following this morning's call, I am proposing the following as an Action Plan to address the concerns with the MIFN Fire Protection Program. As you know, in both the recent house fire and the burning of the RCMP car yesterday evening, low water pressure was reported.

In order to do a systematic investigation, I propose the following :

1. Arrange for the Circuit Rider to travel to the community and test each hydrant and the flow rates and pressure from the water distribution system.
2. Engage a qualified expert to inspect the fire truck. This will either identify problems with maintenance and operation of the asset, or point to another direction.
3. Arrange for a detailed debrief with the firefighters who responded to each event. From the time they arrived on scene to when they were finished, each step is to be listed. The problem with the water pressure at these fires may have been something as simply forgetting to set the proper throttle level for the pump to operate. This may identify the need for more training, which is available.

Depending upon the availability of accommodations, we should be able to this plan into action in the next week or so.

Hi

I understand this will be discussed further at AROC next week. Suggest we have that discussion and then confirm what our next steps would be.

Tom

Hello Tom,

As I mentioned in my e-mail below, we will not be in a position to meet with Mushuau to discuss the expectations associated with an operations/capital co-management for July 5/6 meeting. We require additional time to develop the approach for what an operations/capital co-management would require in order to meaningfully engage Mushuau. The success of the operations/capital co-management will be critical to prevent an escalation to 3rd party management. As such, it would be INAC's position that this task would be Mushuau/IWG's top priority, taking precedence over the initial work plan that was present at the last IWG meeting. It is hoped that we have this ironed out over the next couple of weeks after which we can meet with Mushuau.

As such, we are aiming for the week of July 17 before we can meet with Mushuau. Perhaps the July 5/6 meetings can be re-scheduled accordingly.

Thanks,

Kriss

>>> Tom Keagan 6/21/2017 2:15 PM >>>
Hi Kriss

Thanks for the update.

I'll leave it up to Chris/Rory/Rosemary to sort it out from here but I'd suggest if we don't have the capacity to do our part then we've already failed.

There's nothing in the July 5 or 6 meetings that are outside of the scope or mandate of the existing ICAP/MAP/IWG but if we refuse or are unable to participate it will create a whole new set of challenges

for this file.

I also would think that in your role you as IWG lead you would play a major role in defining how the co-management would work to address the CFMP issues also. The Innu need to be part of these discussions also. INAC can't develop an appropriate model without their engagement. You and Erika are the program experts. Andree can advise you and make the connection between program and expert resource requirements. Bottom line is that it needs to be explored in detail with all parties with full representation.

You are right in that file cannot be managed off the corner of anyone's desk but I don't agree that we can afford to scale back efforts. We clearly need to increase our efforts.

I recognize that the capacity issue is beyond the scope of your control.

Tom

>>> Kriss Sarson 6/21/2017 12:41 PM >>>
Hello Tom,

My trip report will not be ready for a week or two as I have several projects that require my immediate attention. Once I finish the report, I will past it on.

At this time, I will not be able to attend the meetings in Goose Bay. I am not comfortable discussing the IWG group's roles and responsibilities, etc. beyond what has already been discussed at the last IWG meeting until internal decisions are made in regards to the level of support to be allocated to this project. Continuing discussions/advancing the IWG risks establishing expectations that cannot be met if the resources are not available to support the process. I would suggest that until a clear mandate/decision on the region's allocation of resources on this project, it may be advisable to inform MIFN that INAC is still developing the appropriate model to support them on this initiative and current efforts may have to be scaled back until further notice.

Here are several examples of how the lack of dedicated resources are currently impacting efforts on the Innu file:

1. The IWG work plan that was prepared and presented by INAC to MIFN as a reasonable approach for this year is very quickly falling behind schedule and is at risk of achieving only a portion or none of the objectives that were presented.
2. The work plan for Mamu is approx. 3 months behind schedule and is at immediate risk of not achieving the objectives identified.
3. I am unaware of what the Region's expectations are for the current co-management requirement to address capital requirements and would not be comfortable talking to the issue without a clear mandate or plan.

I am committed to support MIFN in their efforts to improve their community, however attempting to piece meal or manage issues off the corner of the desk only risks further confusion and frustration on this very complex file. As you have identified below, there are discussions underway in regards to the management of the Innu File and I am hopeful that these discussions will provide additional clarity to this very important issue.

Thanks,

Kriss

>>> Tom Keagan 6/20/2017 9:14 AM >>>
Good Morning Erika and Kriss

Would you have a trip report or summary report on the results of your meetings last week?

Also, I'm in Goose Bay for July 5 and 6. July 5 am is meeting with MIFN on the MAP/ICAP.

They've (Nick and John) asked me to speak to you about a possible meeting of the IWG for the afternoon of the 5th. Main item they want to discuss is the functioning of the group, roles and responsibilities, etc.

If you can't make it to Goose then call in is an option.

I have a meeting scheduled with federal partners for the morning of the 6th; meetings with SIFN and Mamu (tbc) for the afternoon. You may want to join in for these sessions also?

The current co-management requirement will be one of the discussion items for the morning of the 5th. This will likely carry over into the afternoon discussions as the need to address capital requirements effectively is essential.

Chris indicates he's been talking to Rosemary about changing the way things are managed with the Innu. I'm not sure of the details of their discussion or how this impacts the co-management/intervention discussion. I'm meeting with him Thurs and will get more info then. Also this entire item needs to get to AROC asap and I'm waiting to hear back on the date.

Let me know if you can make the 5th or 6th.

Thanks.

Tom

Atlantic Region Operations Committee

**Record of Decision – Special Meeting
Lennox Island ICP
August 31, 2017**

Participant List	
Rory O'Connor, ARDG	Bill Nye, Project and Implementation Officer
Harold Hines, Director Corporate Services	Mirjana Vaclavik, LED Officer
Barbara Robinson, Director Funding Services	Aaron Akitt, Business Development Officer
Nathalie Levesque, Director ESDPP	Joan Broussard, A/Manager, PCI
Sheila Silva, Director Income Assistance	Tiffany Ward, PCI
Tammy Drew, Manager Community Services	
Agenda Item	Action/Follow-up items
<p>The director of funding services presented the Lennox Island Integrated Community Approach plan. Team members met to review the document, prior to presenting to AROC but it has not been sent to the community yet.</p> <p>The director of funding services presented an overview of the community's status, pointing out the importance of the "Minigoo" fish plant as a key asset but noting it is currently operating at a deficit.</p> 	Director Funding Services to coordinate meeting with community and internal staff for late September.
<p>The community's economic development situation was reviewed by the director of funding services and Aaron Akitt.</p> <p>An ATR has been completed that will allow the community to expand their wharf in an effort to attract more fisherman to the</p>	

<p>processing plant (Minigoo). The community is working with Ulnooweg and DFO to create a business plan to set out goals for the wharf expansion.</p> <p>Mirjana explained that a recent water study in the community shows an increase in fish oils from the processing plant entering the water system. There is a concern increased processing could make this situation worse.</p>	
<p>Roundtable:</p>	

A-ROC FORWARD AGENDA			
Items	Purpose	Presenter	Notes
Date: October 10, 2017			
**Cancel due to holiday unless pressing issue arises			
Date: October 17, 2017			
AEN update	Information	Chris McDonnell AEN Spokespersons	60 minutes
Date: October 24, 2017			
ATAS travel – quarterly update	Information	Director Corporate Services Angela Greene	15 minutes
Date: October 31, 2017			
Date: November 7, 2017			
Ministerial Special Representative on Border Crossing	Information	Nathalie Levesque Will Olscamp	30 minutes
Date: November 14, 2017			
**Cancel due to holiday unless pressing issue arises??			
Date: November 21, 2017			

Items on the Radar (identified as a possible agenda item in the future):

1. Atlantic Multi-year Increase – “HOW” to implement (Harold) – Mid to Late September
2. Capital Facilities Maintenance Program Review Plan – MAMU (Tom/Rosemary) – mid September
3. Management Action Plan – To return to agenda on December 12, 2017 (Harold)
4. ICA Communities – One or all with plans (Barbara) suggest one ICA community every 2 weeks
5. Committees to provide information to AROC related to work plan objectives and updates, PSES, FMC, TPC, Social, Professional Development, Pride and Recognition
6. FN Profiles

Standing Items: (to remain on AROC agenda)

1. Jordan's Principle – Quarterly Report and Discussion on Key Challenges (Schedule for last week of every month) (Nathalie)
2. Engagement – monthly discussion (Nathalie)
3. Onboarding

Date: 9/25/2017 11:14 AM
Subject: Re: Fw: HOUSING BUDGET 2017 SUBMISSION TO HQ - REVISED FORREGIONALALLOCATIONS.

That's the budget figure I reflected in the Spreadsheet (column #5) so we should be good to go. The percentages actually work out to be [REDACTED] to utilize the full budget.

Just a suggestion, where Annapolis Valley was missed last year and as a result received not Reno \$'s, we could round the percentages of to the original, [REDACTED] which would leave a balance of [REDACTED] This could be allocated to AVFN? Comments? Let me know what you think?

Just to confirm, Elsipogtog & Mushuau will not be receiving any of this Renovation budget.

Revised Spreadsheet is under CIDM# 700821

>>> Diane Wade <diane.wade@aandc-aadnc.gc.ca> 9/21/2017 7:48 AM >>>

Team, I didn't hear any roars of objection so we're good to go. Please proceed with advising FNs and preparing amendments. HANG ON - Betty has to update the amounts based on the [REDACTED] below first. Once she's done that, it's a go.

Di

>>> Diane Wade <diane.wade@aandc-aadnc.gc.ca> 9/19/2017 7:34 AM >>>

Thank you Betty for putting together some options on distribution of the small amount of funding we have.

Per our meeting today, we'll use the [REDACTED] planned for capital sessions towards the renos. We have [REDACTED] available and I'd like to go with [REDACTED] if nobody has a strong argument otherwise. It's consistent with [REDACTED] intent to address highest needs.

Betty, in option [REDACTED] Please use it to fund the capacity project (if you deem that above renos) where they have momentum on it. It means no renos for them though.

[REDACTED] It's being distributed as follows:

- CMM tech services
- EM, water services
- [REDACTED] Metapenagiag youth centre
- Tobique site assessment
- Contribution to Elsipogtog pilot project
- housing renos

I'm not including MIFN and Elsi as part of the [REDACTED] since we're funding the multi-unit and a portion of the pilot.

Please consider the housing and let me know by end of day today if you have concerns. I'd like to get this out by end of the week.

Of important note, this is not B2016 funding so in letting them know, we need to ensure its clear that it's regional re-allocations permitting some flexibility to fund housing.

Subject: HOUSING BUDGET 2017 SUBMISSION TO HQ - REVISED FOR REGIONAL ALLOCATIONS.

Hi Diane

Sorry I didn't get this to you earlier... but got busy outside and slipped my mind.

Here is the CIDM reference to the HQ document I revised and added a few columns at the end of the Renovations tab. These columns are inside the ---- out line between INAC funding and the comments.

There are 5 different variations of budget splits based on a budget [REDACTED] Each calculation is described in the heading, 1. Average Cost Distribution, 2. Straight-line average, 3. Health & Safety only, 4. Budget weighted on PRR scoring as noted and 5. Highest Need Only based on PRF score.

Let me know if you have any questions, I can adjust the numbers pretty quickly based on any budget.

Take Care

Hi Kim,

s.19(1)

I have to get informatics send you the funding agreement as it is too large to send from my e-mail account ... which is over it's limit and I haven't been able to send anything.

Sorry for the delay.

Would tomorrow, Thursday, Feb 4 at 1pm work for the consult?

I'm on the road today but you can reach me at [REDACTED]

Thanks so much and, again, apologies!

Hi Erika

I'm working on a key Innu officials and contact list under cidm # 675725 now still in draft phase as I like to double check my info and I am still compiling and adding contacts...if you have access to cidm you can use that for now. If not I can copy and paste the info to you.

If you have contacts that I haven't added that you may have or if there are any noticeable errors to you can you let me know as well?

Thanks and have a great long weekend ☺

Housing

MIFN was funded for three duplexes, not two as indicated.
Final decisions regarding this project is required no later than June 16, not July 1.

I have completed minutes for the Infrastructure Working Group meeting on May 4 and a letter to Chief and Council indicating the tight time lines associated with successfully completing the duplex project.

I will forward them to you asap.

Subject: RE: Duplex Project

Hi Erika

They seem to have answered most everything.

They mention their NSDC crew. Do we know how many folks that is? There will be a lot of difference in a foreman plus 6 locals vs a half dozen experienced tradesmen plus some locals.

If this is all correct the only add ons for the community would seem to be at least these:

- All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI. Does not include any delays, storage or unforeseen delivery issues.
- Electrician to be provided by community, panel mast/ underground connection and any water and power meters supplied and installed by community electrician.
- Building services are the responsibility of MI to the building perimeter, connections to sewer, water and power from building perimeter to interior by NSDC
- Equipment assumes the community has a backhoe, loader, excavator, zoom boom and forklift (both with fork extensions) and flat bed truck and trailer all in good working condition with qualified operator(s). Assumes fuel is available in the community
- Assumes 6-8 skilled community members at all times (that live in the community) at [REDACTED] hour (2-3 per house). Doesn't factor any training budgets or wage subsidies. Should NSDC have to bring in outside workers due to labour deficiencies costs will increase and billed to the project.
- Does this mean they pay the local labour \$18?
- (it would be good to have an outside labour rate established before they start)
 - Final landscaping are not included in NSDC scope

"Rear door at grade". Not sure how this works if the standard detail says only 5' of backfill allowed on the basement wall but I guess we will see in the final submission. He does say stairs are included so if one becomes necessary then I guess it will not be extra.

-Re the windows. He says meets the NECB. I am curious about double glazed sliders as the ideal solution. Casements will always seal better than sliders. Codes are always considered the minimum requirement and I would suggest we should be exceeding code minimums, especially in the windows and doors. Do we have brand names of the supplier in the specs somewhere?

He mentions an Aug 21 agreement. I have the Aug 01 set you sent me. Is there more?
"As per project specifications sent". Do you think this is also the Aug 01 set or something else?

They seem to have experience in the North. Notes like equipment in working condition and having fuel available tells me they have had such issues in the past and learned from them.

That's all for now I guess.
Regards

cm

>>> Steve Marshall <steve@nsd-corp.ca<mailto:steve@nsd-corp.ca>> 9/7/2017 5:25 PM >>>

Hi Erika,

Please find attached the comments you requested. I am not sure if you have seen the packages I sent to Chief and Nick as most of what you are looking for is in them. Nick, if it is ok, can I send Erika the packages?

In a nutshell, we are working from the assumption that the lots are generally ready to construct on and the services are run to each lot. We will take it from there to completion up to a general final lot grading.

Erika, rest assured that we have a very good handle on the project and our team is very experienced in executing projects such as this one. MI is in good hands and we will ensure that the project is a success.

Let me know if you have any further questions.

Thanks Erika.

Steve

Subject: Duplex Project

Hi Nick,

Further to receipt of the information provided by Steve Marshall, Northern Shield, the documentation was forwarded to Public Works & Government Services Canada for their review and feedback, as has been the practice with housing projects resulting from Budget 2016.

Please note the following summary of that consultation:

- * Are shipping costs from Ontario (the address of Northern Shield) or Edmonton, AB (the address of Magwall Building Systems)? Please provide the cost breakdown for transportation.
- * As per specifications sent for the project :
- * -All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI.
- * Who will provide warranty, Northern Shield or Magwall?
- * Northern Shield provides the warranty on the build and any subtrade or product warranty is passed on to customer (appliances, materials, windows etc)
- * For clarity, Magwall is our SIP panel manufacturing company and are not directly associated with the project. Everything is under NSDC.
- * Please provide roof details.
- * To follow with full engineered plan set
- * Will all openings (windows and doors) be factory framed into the panels or framed on-site from pre-cut pieces? Concern is noted that, if the latter, site labour will need to find the correct parts (possibly in the snow) and nail them together in the right order.
- * For the Duplexes the windows come in installed in the units as they are shipped as modular units, for the bungalow the windows and doors will be cut on site by NSDC crew who are very experienced with the products and installation details as well as the remote community setting and extreme weather conditions.
- * Concern is noted for the tremendous amount of site labour and high potential for error due to the requirement of precise assembly details (i.e., if lumber is cut incorrectly or damages MAG board material). What contingency plans are in place to mitigate risk?
- * For all remote projects we do include a material contingency for some items (ie ship some extra panels) also the site coordination critical items are managed by NSDC crew for accuracy.
- * Submitted drawings (from 2016) are for a project in Ontario. As code items vary from place to place (especially with regard to wind and snow loading requirements), please forward a design for Natuashish and a local Engineer stamp.
- * This will be completed once project is fully awarded (signed contract) and we can engage the local P.Eng stamp for review, no concern from NSDC as we design and build in different provinces to different codes and different countries to international codes.
- * Please identify all 'by others' (i.e., fascia and gable trim, drip edge, gutters and basement support posts, etc.).
- * AS noted in the specifications submitted :
- * Notes, Assumptions & Exclusions; Community to provide the following:
 - * -Site plan details on lots, sizes, municipal approvals and regulations.
 - * -Flat, leveled and cleared sites.
 - * -Service Connections for hydro, water and sewer for the building connections. Estimate assumes sites are serviced with utilities at the curb.
 - * -Equipment assumes the community has a backhoe, loader, excavator, zoom boom and forklift (both with fork extensions) and flat bed truck and trailer all in good working condition with qualified operator(s).

Assumes fuel is available in the community. All provided at MI costs. Down time and costs of replacement equipment and associated costs not included and subject to price increase.

- * - All permits, site engineering, access to lots, maintained roads, snow clearing services, waste removal.
- * Civil work allowance: assumes basic work required on site to clear and generally level the lots, run water, sewer lines, excavate basement, backfill and grade for final landscaping by the community prior to unit arrival.
- * Notes: Assumes 6-8 skilled community members at all times (that live in the community) at [REDACTED] hour (2-3 per house). Doesn't factor any training budgets or wage subsidies. Should NSDC have to bring in outside workers due to labour deficiencies costs will increase and billed to the project.
- * -All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI. Does not include any delays, storage or unforeseen delivery issues.
- * Please identify roofing material. Details only show panel construction. Does community have to supply/install shingles/metal? Can roofing be nailed into the roof panel system
- * Previous project files that were sent for reference included panel roof details. For the current project : Duplexes and the Bungalow the roof will be as stated in the specifications (attached for reference) Wood Trusses , roof sheathing will employ FRP Entertec SIP panels with embedded solar roof package and conventional plywood, connection materials and consumables, shingles and labour included in pricing.
- * Roof details all show sloped SIP panels which imply sloped finished ceiling. Is there to be a flat ceiling of some sort? If so, is labour and material included?
- * Previous project files that included a lofted / sloped ceiling sent as reference drawings. For this project the roof and ceiling construction will be as stated in the specifications (attached for reference).
- * Are labour and material for 5-6' exterior stairs included?
- * Yes, materials and labour for the front wood porch and stairs to grade as required. Rear door at grade. Pricing does not include any decks but does cover stairs and required landings.
- * Back slope away from the house to be a minimum of 1 in 12 will be difficult to obtain on all sides of the structure.
- * Where is the reference to th 1 in 12 slope? If it is in our details it is a an oversight.
- * Final landscaping are not included in NSDC scope - we have no details on the sites, topo etc. However, we will ensure the units are backfilled and sites are graded to slope away from the houses.
- * Foundation sections show a gravel footing which only works if the material below it is solid and undisturbed.
- * Previous project files - sent as reference drawings only. Foundation details are being reviewed for location and code requirements by P.Eng. As per project specifications sent : Supplied and installed by NSDC - Magboard SIP foundation wall panels on concrete footing, Connection materials, wrap and consumables, PWF wood for foundation floors with insulation board as required (or approved equivalent) Note: aggregate for foundations not included. Supplied by others. Assumes no weeping tile.
- * Foundation sections show the floor panels sit directly on the subsoil which will require grading of the gravel to be exactly level and all services (water/sewer/power) needs to be in place before the floor goes down. Detail also notes 'optional' foam insulation under the floor. Is that included in the package and who installs?
- * Previous project files - sent as reference drawings only. Foundation details are being reviewed for location and code requirements by P.Eng. As per project specifications sent : Supplied and installed by NSDC - Magboard SIP foundation wall panels on concrete footing, Connection materials, wrap and consumables, PWF wood for foundation floors with insulation board as required (or approved equivalent) Note: aggregate for foundations not included. Supplied by others. Assumes no weeping tile. Building services are the responsibility of MI to the building perimeter, connections to sewer, water and power from building perimeter to interior by NSDC.
- * No indication of waterproofing between basement wall and basement floor. Typical details do not show exterior perimeter drains which will most likely be required.
- * Foundation details are being reviewed for location and code requirements by P.Eng and will be built accordingly/to code.
- * Standard details show vertical holes in panels for wiring installation. Are the holes placed relative to an electrical plan or are there just two per panel as shown? Some details show matching holes in the top plates. Are the holes in the plates pre-drilled or drilled on site?

*Released under the Access
to Information Act*

*Communiqué en vertu de la
Loi sur l'accès à
l'information*

- * Panels ship standard from supplier with (2) electrical chases in each panel for electrical runs, top plates are drilled on site as required.
- * The submitted Magwall plans show 2" x 8" construction. Is that what is included in the current proposal?
- * Yes the panels are 8.25" thick, this is also required to meet the R values as per NBC.
- * Are the windows triple glazed?
- * As per project specifications sent : Supplied and installed by NSDC - windows shall meet the requirements of Zone 7 and the U value requirements of the NECCB. Double glazed, slider windows, with Low E argon gas, vinyl clad with insulated spacers is anticipated. Windows shall be insulated at the perimeter with low expanding foam.
- * Does the proposal include supply and install for gear like HRV, water heater, bathroom fans, appliances, kitchen hood, electrical panel mast, water and power meters, etc.?
- * As per project specifications sent : Heating and Ventilation section, HRV included in design and pricing, Water Heater 40 gallon included in design and pricing, bathroom and kitchen fans included, appliances - fridge stove washer and dryer., electrical - main panel with circuit breakers included and install, Assumes Electrician to be provided by community, panel mast/ underground connection and any water and power meters supplied and installed by community electrician.
- * Is the cost of excavation, site servicing, installation of underground lines, hook ups for water/sewer/power, driveway gravel, curb cuts at the street included?
- * See above notes in reference to Exclusions for underground lines, hook ups for water/sewer/power, driveway gravel
- * See notes to agreement issued Aug 21 to MIFN - Civil work: Assumes basic work required on site to clear and generally level the lots, run water / sewer lines, excavate basement, backfill and grade for final landscaping is complete at MIFN costs. Landscaping not included.
- * Do these plans have 'winter lobbies' (arctic entrances), cold porch for winter use/storage, space for country meat prep and large pantry for supplies coming in via boat?
- * Yes - as per attached concept plans submitted.

Please provide us with Northern Shield's response to these comments/questions as soon as possible. Can you tell me the status of the project? Has MIFN signed a contract with Northern Shield?

As previously indicated, INAC wants to ensure that these housing funds are best utilized to serve the community and that new infrastructure is code-compliant, appropriate for the climate and will serve to increase current housing stock with infrastructure that will have a suitable life span.

Thanks so much,

Erika McCallum

>>> Clifford Milligan <Clifford.Milligan@pwgsc-tpsgc.gc.ca> 8/29/2017 6:01 PM >>>

I am sending these now just to keep the discussion going. Some of these comments are about generalities that the proposer does not need to see. I will separate out the tech questions for them once I see the rest of the package as I don't really know from these docs what is included and what is not.

So to start with, if I follow this correctly, the proposal is from Northern Shield Development (mailing address Barrie, Ont.) but the product is actually coming from a company in Edmonton, Magwall Building Systems. As a portion of the overall project the transportation costs must be considerable. I wonder what the cost would be direct from Magwall.

If the contract is with a middle man (Northern) and there is a problem later on, they will defer to (blame it on) Magwall and the Band has no contract with that supplier which, in my opinion, provides a high potential for warranty problems.

I don't have a floor plan of the unit so those comments can come later. Neither the Magwall or the Northern sites include standard plans to view. Also the detail packages I have are only for ground floor and foundation. There are no roof details.

In my experience with panel construction the intent is to minimize on site labour by doing as much as possible in the factory. This system uses a 4ft maximum panel size. This considerably increases the number of on site joints and on site labour. Every joint has to be made air tight and water tight. Two men can easily lift and place an 8 or 12 ft. panel, especially in a one storey building and those sizes will fit in a container. That is why other systems maximize panel size. Even more important than size is that all openings, windows and doors, should be factory framed into a panel to reduce site labour. It appears from these details that all of the openings are to be framed on site from pre-cut pieces. This means that for each opening someone has to find the right parts, possibly in the snow, and nail them together in the right order.

This system has a tremendous amount of site labour and a high potential for mistakes due to the requirement of precise assembly details. Stick framing is infinitely more forgiving. What happens if someone cuts lumber the wrong size or damages that special MAG board material? It is a long way to go to get a replacement.

The submitted drawings (from 2016) are actually for a project at a FN community in Ontario. I called them and their housing guy is going to call me back but their web site says there are no projects under construction right now. Code items will vary from place to place, especially with regard to wind and snow loading requirements so we would need a design for our site and a local engineer stamp.

I am not aware of the actual terms of the proposal but I see a number of "by others" notes in the standard details. Fascia and gable trim, drip edge, gutters and basement support posts are a few examples.

I don't see anything that mentions roofing material. The standard roof details only shows the panel construction. Does the community have to supply and install its own shingles (or metal)? Can you actually nail into the roof panel system?

The roof details all show the sloped SIP panels which imply a sloped finish ceiling. Is there to be a flat ceiling of some sort or will they retain the high sloped ceiling? If there is to be a flat ceiling of some type is labour and material included for this?

The foundations details indicate that the backfill cannot be more than 5 ft. up on the wall, which means there will be a requirement for a 5 to 6 ft. stair and landing at the front and back doors. Are labour and material for these stairs included?

The foundation sections show a back slope away from the house to be a minimum of 1 in 12 which may be difficult to obtain on all sides of the structure.

The foundation sections show a gravel footing which only works OK if the material below it is solid and undisturbed.

The foundation sections show that the floor panels sit directly on the subsoil. This means the grading of the gravel has to be exactly level and all services, water, sewer and power need to be in place before the floor goes down. The detail also notes "optional" foam insulation under the floor. Is that included in the material package and who installs it?

I see no indication of waterproofing between the basement wall and the basement floor and the typical details do not show exterior perimeter drains which will most likely be required.

The standard details show vertical holes in the panels for wiring installation. Are these holes actually placed relative to an electrical plan or are there just two per panel as shown? Also some details show matching holes in the top plates. Are the holes in the plates pre drilled or drilled on site?

The submitted Magwall plans show 2" x 8" construction. This is a good thing but is that what is included in the current proposal?

Do they get triple glazed windows?

Does the proposal include supply and install for gear like HRV, water heater, bathroom fans, appliances, kitchen hood, elec. panel, elec. mast, water and power meters, etc., etc.?

What about the cost of excavation and site servicing? Installing underground lines and hook ups for water, sewer and power. Gravel for the driveway and curb cuts at the street?

We have had much discussion on plans and things the band wants. Do these plans have winter lobbies at the doors and is there a cold porch for winter use / storage. What about a space for country meat prep and a large pantry for when the boat comes in?

Oh my!

Subject: DILLON CONSULTING

Hi Tom & Diane,

I just got off the phone with Ryan Dunbar (Kingsclear FN) who works for Dillon and was involved in the preliminary work for Mushuau. He is going to send me everything they did for MIFN for our review however did indicate that the work was limited to a letter. I'll forward when I receive it from him.

Dillon continues to be interested in working with MIFN.

Subject: Nalcor call June 6th and Conf call this afternoon

Good Morning,

I was just speaking to Tom and noticed a new appt for tomorrow morning for the Nalcor call, wanted to tell you I couldn't find a room for you guys on this onesorry

See you this afternoon in Rose's office for the 1 - 4 pm (ICAP, IWG) I'm going to start the call for you guys in case Tom is a bit late - his plane lands at 1:05 NFLD time so he will be calling on the run.

Thanks,
Ang

Good morning Tom, Les

The latest victim of suicide is Thunder Tshakapesh, son of the Deputy Grand Chief of the Innu Nation.

Thunder was 17 years old !!!!!!! and a musician. He was missing for two days and found hanged at the Elders gathering area by his girlfriend.

The Office has been closed today and there is still no word as to when the bodies will be released for the funerals to take place,

The Chief and most of the Council are in the community.

Council have offered full support to the families.

I will update as soon as I have more information.

Have a nice day

Nick

Jim

The trip will not be next week, we will aim for the following week however we will have to secure travel arrangements first. We will advise a potential date when we have a better handle on flight and hotel availability.

Thanks
D

Other than census info, PSPC has the housing report through Cliff. Emily, does PSPC have the report?
Victor is Cliff's colleague and needs the report for another study. I think Cliff is away.

Erika, can you pls contact Nick, Bill and Phil re the furnace report.

I know the reports are important for the visit but delaying may turn out to be a longer delay than we all wish given activities in the community. I think we can get you the housing study and worst case scenario, furnace report while in Natuashish.

Hi Neil,

Thanks for the e-mail. Diane and I are trying to find that information for you. I believe you already have the community contact information but I am copying the info below. Once we have sent the reports to you, I would suggest to touch base with him in order to narrow down dates and availability and try to get any other info that may be missing. Once that has happened you can share the agenda with all of us and coordinate visit.

Diane - I think it would be prudent to let the community know that the trip will not happen next week if the reports have not been received to date. Thanks

Subject: RE: First week in May trip to Natuashish

Hi Victor,

Fred Earle, P.Eng. will be leading the community visit and consultation, under my direction. Please copy both him and Dean Hopkins on all project communications.

Per the last meeting minutes (attached), the site visit and consultations were to be arranged after receipt of the furnace and housing assessments. We have not seen them. Have these been received?

We have a proposed itinerary and agenda drafted. We can circulate these after we firm up the exact date for the site visit and consultation which I suggest will be Mid May to give parties time to plan. We should circulate the itinerary and agenda to all relevant parties, after you guys approve of it.

Many Thanks!
Neil

Subject: Re: Recovery

Hi Phil,

The recovery is for emergency shelters therefore not linked to the other items listed in your email. I suggest we proceed with the repayment plan for this item and wait until your return to sort out the rest. This way we can begin to resolve outstanding amounts.

tk

>>> "Philip Clarke (CA - ADVS)" <p.philip.clarke@pwc.com> 5/10/2017 6:11 AM >>>
Andree:

I am away on vacation until May 23 and not back in the office until May 31 -. I would like to take a look at the amounts before agreeing to any recovery and payment plan.

I also do not think this letter is complete and accurate.

1. It ignores any amounts INAC has payable to MIFN, including but not limited to the \$209k owing from electrification from FY16 annual report. Any operating invoices from this period remain unpaid given INAC has not yet flowed sufficient funding.

2. It ignores that the AP to NL Hydro is being repaid over time as reported to Diane Wade, Capital Officer. (Segregated from the outstanding capital and invoices subject to commercial dispute, which are for the most part unfunded.

I would suggest that we connect and deal with each issue. I would prefer to do this on my return - Make sense?

In the interim I will get someone to take a look at the recoveries and INAC AR and we can come up with a plan to resolve.

Cheers!

Subject: Mushuau follow-up

Hello,

Can we be penciled in for a follow-up to the Mushuau working group initial meeting from last week. In particular to potentially advance the past effort to formalize an agreement with Nalcor for the operations of the generation plant. I have attached the copy of the agreement that we have from 2005, [REDACTED]

Also, we would like to discuss update the airport agreement (may mirror some of the Nalcor agreement language) and potentially developing an agreement for the wharf with NFLD government.

Thanks,

Kriss

Subject: Mushuau follow-up

Hello,

Can we be pencilled in for a follow-up to the Mushuau working group initial meeting from last week. In particular to potentially advance the past effort to formalize an agreement with Nalcor for the operations of the generation plant. I have attached the copy of the agreement that we have from 2005, [REDACTED]

Also, we would like to discuss update the airport agreement (may mirror some of the Nalcor agreement language) and potentially developing an agreement for the wharf with NFLD government.

Thanks,

Kriss

Subject: Fwd: Fire in Natuashish

>>> Jennifer Taylor 5/8/2017 2:53 PM >>>

Jacob Barker reports on Labrador for CBC News from Happy Valley-Goose Bay.
Follow Jacob Barker on Twitter (<https://twitter.com/JacobBarkerCBC>)

Two youths were hurt in an early morning fire in Natuashish, Labrador, on Monday.

The fire destroyed one house and damaged a neighbouring one.

J.B. Tshakapesh told CBC News the fire started in an abandoned house next door to his home.

Tshakapesh said he saw a group of young people in the house around 5:30 a.m.

"The police was already there with the ... teenagers," he said.

"There was a young child lying on the ground and I heard he was burned ... He was on a stretcher when they took him."

The RCMP said Monday afternoon that two boys — one 11 years old, the other 17 — suffered serious injuries in the fire and have been sent to St. John's for medical treatment.

Tshakapesh said the abandoned house is known to be used by young people for sniffing gas.

"The gas sniffers usually occupy the house in the nights and early in the mornings," he said. Faulty hydrant

The fire hydrant across the street wasn't working, according to more than one eyewitness, so volunteer firefighters had to drag the hose to another hydrant to be able to fight the fire.

Eyewitnesses and pictures show the house was completely destroyed. Tshakapesh said his house was damaged by the heat from the fire.

"The plastic windows, they almost burned, it was too hot," he said.

Hi:

This is on CBC right now. A house has burned to the ground with another damaged. They say a fire hydrant wasn't working and a child was burned.

See attached.

Hi:

This is on CBC right now. A house has burned to the ground with another damaged. They say a fire hydrant wasn't working and a child was burned.

See attached.

Todd

Subject: Mushuau follow-up
Attachments: Draft Electrification Agreement.pdf

Hello,

Can we be pencilled in for a follow-up to the Mushuau working group initial meeting from last week. In particular to potentially advance the past effort to formalize an agreement with Nalcor for the operations of the generation plant. I have attached the copy of the agreement that we have from 2005, [REDACTED]

Also, we would like to discuss update the airport agreement (may mirror some of the Nalcor agreement language) and potentially developing an agreement for the wharf with NFLD government.

Thanks,

Kriss

FYI. just seeing this ended up in my junkmail. I think we're set and we could be available by phone as needed.

on the call Friday, I suggested Crosbie give Bill or Terry a call directly to work out details. A middle person is just inefficient where all parties are ok.

Subject: MIFN - Capital Reporting Outstanding

Diane:

Can you connect with me before Friday.
I am going on vacation for 2 weeks and want to get any capital issues resolved before I go:

1. Community Infrastructure and Annual Report Annual #1 - 2015-2016 (1 report) - Can you send me the form for this? I am certain we have submitted given it is so old but wanted to check to make sure I am not confused.
2. ACRS Reporting 2015-2016 and 2016-2017 (2 reports) - My understanding is that this reporting is done by a third party contracted directly by INAC. Can you confirm? I am not familiar with ACRS reporting. The only item I can think about is the listing of items requiring immediate action. Can you confirm the requirements here?
3. Capital Projects - Capacity Development - Amendment #3 - \$30k and Amendment #5 - \$200k (9 reports). I believe this ties out to agreement 1617-P003458. This is outstanding. I will have to follow up with Nick/Bill.
4. Capital Projects - Amend#4 - Water - \$300k (4 reports). I am not familiar with this project and will have to follow up with Nick/Bill.
5. Capital Project Amend #6 - Electrical - \$20,300. We prepaid \$10,150 but don't have an invoice to confirm the work

is complete. On receipt of the invoice from NL Hydro we can finalize the project. DCI will be sent separately on this project to March 31.

This should be it. My cell is 1-506-866-8820.

Dear Diane,

The Pan-Canadian Framework on Clean Growth and Climate Change has tasked the Federal, Provincial and Territorial governments to reducing reliance on diesel in Indigenous, northern and remote communities. As part of the effort to deliver on this commitment, NRCan has asked our team (we work with Chris Henderson who I believe you already met) to update the information in the Remote Communities Energy Database (<https://www2.nrcan-mncan.gc.ca/eneene/sources/rcd-bce/index.cfm?fuseaction=admin.home1>).

This database is an important source of information for communities, researchers, utilities and policy makers. We are hoping that you will be able to provide some of the data required for this update.

The attached Excel form contains information to respond to this request. We have already input data from the Open Data website and other sources. We are still looking for additional data, such as

*Released under the Access
to Information Act*

*Communiqué en vertu de la
Loi sur l'accès à
l'information*

heating fuel use, wood availability
energy budgets
renewable energy systems, if any
community energy planning reports, if any

In the attached file, Mushuau is the AO column - maybe you can also check what we currently have, in case anything seems incorrect to you.

Should you have any questions or want to discuss how to address our request, please contact me by replying to this email or phoning the number below.

We greatly appreciate your time and support in this important initiative,

Martin

Victor/Jim,

We are booking flights to Natuashish to arrive Tuesday May 9th.. Our itinerary will commence that day and conclude the following day Wednesday May 10th. Can we be accommodated for these dates? We will require a meeting room for these two days.

Will the following contacts be available for these dates?

1. Cajetan Rich, Director of Infrastructure
2. Toon Rick, Director of Housing
3. Terry Burt, electrician/supervisor
4. Bill Ferguson, CFO
5. Nick Paradisis, Band Manager
6. John Nui, Chief
7. Band Council
8. PWGSC Representative via conference call
9. INAC Representative via conference call
10. NL Hydro Representative

Regards,

Fred Earle, P.Eng.

Good morning Erika!

Down to the last couple days here, one conference call left tomorrow AM with Darlene if you're interested to join.

In regards to the NFLD works we've been chatting about, I wanted to take the chance to introduce you to our operations manager Tony Lajo. He will be your point of contact getting this rolling. He will provide you with some drawings and pricing options to see what we can help you with. If you're available by phone today we could have brief chat to introduce the two of you.

Look forward to hearing from you.

Thanks,

Hi Emily,
I can't see the data and it wouldn't be my call, but if the data itself is too cumbersome at this point, perhaps a summary breakdown is appropriate for both MIFN and Cliff at this stage?

Awesome, thanks Bill! Big thanks to Tara and her team for gathering all this information!

We'll get to work on imputing the housing census information into our models to complete this portion of the work.

Nick, Cliff and Diane - Did you want us to present this data when we come up in June, or would you like us to amend the report with this data at this stage and send along a revised draft report?

Emily

Erika, this is still the last i saw of the furnace report and i think there is info missing.

Can you work with Victor to

- 1) confirm he has the full furnace report. if not, then pls request it from Nick/Bill
- 2) confirm he has the full housing stock report so he can provide both reports to Crosbie

thanks,
Di

Regarding the furnace replacement at the arena and repairs at the band council office: The Astron is currently at Goose Bay due to wind. Once this run is complete, the next run is dedicated to Natuashish. The furnace and other materials are in Lewisporte waiting to be loaded. As soon as the freight arrives, we will have Rod & his helper on site (preferably same day or next) to complete the install and repairs.

Hi,

Please not attached audit follow-up letter for 2016-16.

Note: Results of prior years
The recovery [REDACTED] has been set-up in the system. It is now up to me to pursue the repayment.

Not sure about the other items i.e.: Potential recovery Nalcor funding, Post secondary, and [REDACTED] in deferred revenue under NP5A.

Could program provide an update on these in advance of our meeting next week so we know where things stand and can update the Council?

Follow-up items 2015-16:

Unexpended funds Social [REDACTED] (Emergency Shelter). Do you need an update on this item? Plan?

Will check on PAYE as well. Still quite a few outstanding reports so we may not be able to release those amounts just yet.

Hi,

Please not attached audit follow-up letter for 2016-16.

Note: Results of prior years

The recovery of [REDACTED] has been set-up in the system. It is now up to me to pursue the repayment.

Not sure about the other items i.e.: Potential recovery Nalcor funding, Post secondary, and [REDACTED] in deferred revenue under NP5A.

Could program provide an update on these in advance of our meeting next week so we know where things stand and can update the Council?

Follow-up items 2015-16:

Unexpended funds Social [REDACTED] (Emergency Shelter). Do you need an update on this item? Plan?

Will check on PAYE as well. Still quite a few outstanding reports so we may not be able to release those amounts just yet.

tk

Subject: Re: to discuss Innu Meetings week of May 1-5

Hi,

Just a suggestions, Dot has been working on a draft ICA plan for MAMU and I am looking for an update on Sheshatshiu Management Development plan.

Tks

>>> Kriss Sarson 4/18/2017 10:25 AM >>>

Hello,

Do you have agendas for the proposed meetings and who is attending the meetings from INAC? If we can coordinate our time with the parties that would be great.

We have a considerable list of actions items that we have to work with MIFN that relate to outstanding program requirements that are not identified in their Map . We are preparing a draft work plan to share with MIFN and start the process of moving items forward.

We anticipating having to meet with Mamu to review a draft work plan to address program deficiencies related to the management of the school assets.

For SIFN, we likely try to meet to discuss capital projects and a quick inspection of the lagoon.

Kriss

>>> Tom Keagan 4/18/2017 8:01:50 AM >>>

Hi Kriss

Will likely go ahead with whoever is in today but we'll also have another brief session when everyone is back.

As of now it looks like MIFN on 3rd and 4th for the ICAP/MAP (3rd) and infrastructure working group (4th) in Goose Bay.

Have a mtg set with Mamu for 9-12 on the 2nd. You can join in for that one if you like or arrange something separate if needed.

Do you have something on with SIFN for the 1st week in May also and when are you back in the office?

Tom

Subject: FNIF - HQ electrification project

Hi, last week we were told to submit the electrification (National project) through the regions. We didn't get it into the roll-up due last Thursday but please work on putting the application together in collaboration and in icms so that it's somewhere.

I know we're doing an electrification project here in the region but I don't think there was overlap.

Just let Megan know when it's done.

thanks,
Di

>>> Oona Keagan 4/13/2017 11:56 AM >>>

Please see that attached summation of the immediate health and safety issues identified via the ACRS report. We were provided a copy of the report Friday, April 7th, 2017 but today is the first day I've been able to review. I have yet to review the full report but wanted to send this along ASAP.

For your information, an allocation of [REDACTED] for the operations of the shelter has already been committed in GCIMS. Health Canada provides an additional [REDACTED]. Therefore the funds are available for these repairs to take place immediately. I trust you will be able to impress upon them the urgency of getting these completed. It would be helpful to get a sense of how much can be done without requiring the shipment of supplies. It would be helpful to me if you were able to get a commitment from the band to have the repairs completed by no later than the end of May.

Thanks!

Hi Erika, just tried to reach you by phone to find a resolution to this, but was unable to get through. Please give me a call at the office (709) 739-8202. I'm travelling Monday and Tuesday, but can be reached on my cell (709) 749-0715. I'll actually be driving by Amherst on Monday and can drop off a USB key if that helps.

Emily

Hi all - as promised find attached the draft report for the Housing Needs Assessment. This document will be further refined after a meeting with the chief and council tentatively scheduled for June, and the housing census data that Tara Rich from the Housing Authority is currently completing. As requested I'll get our accountant to put together an invoice for our work to date, this will follow as soon as we have it ready.

Diane, I saw some emails suggested this should maybe go to Erika as well. Unfortunately I don't have her contact info, can you forward along and please provide her email for future correspondence.

Cliff, we discussed using a different method that will work with your fire walls. I am happy to oblige, but hadn't yet heard your suggestion, so have included as a Google Drive link for now.

I'm eager to hear your feedback on the report to be incorporated in the next revision.

Talk soon,

Emily

Hi

Not a lot of detail yet other than ICAP mtg on 3rd and infrastructure WG on 4th. These will likely go for a full day each day.

We should get together on Tues with the full group to discuss other details such as possible mtgs with SIFN and MTIE. I'll ask Angela to set something up.

Thanks.

Tom

Hi Tom,

Wondering if there is a draft schedule for the meetings in Goose Bay the first week in May. Just wanted to make my travel arrangements.

I'll check in with Angela about booking a time with you next week for a Mushuau de-brief.

Thanks!

FYI - Mushuau keeps talking about this. This might save some growing pains if this becomes a action item.

>>> Csaba Kazamer <Csaba.kazamer@aandc-aadnc.gc.ca> 4/13/2017 9:45 AM >>>

Ran in to a chap with MCW maricor last night. We worked together on a few energy efficiency projects and a building design.

I brought up the Mushua file. He said they installed wind turbines for the inuit in Rigolet. Dropped power from \$1.20 per kWh (diesel) in less than half. Turbines are producing power at \$.16 to \$.20 per kWh.

Thought you might be interested in having a chat.

Cheers,

CK

Subject: RE: MUSHUAU multiplex comments

Just to follow up.

I have a bunch of notes on the plans in the PDF I sent but I thought I also had some written comments, as I recall noting the lack of venting for the wood stove like Kriss did. There were also other items discussed like metal roofing, triple glass with one Lexan pane, cement board instead of regular drywall for the walls, unit size and number of bedrooms, etc., etc.

Can't find them though and I don't have a copy of whatever Lindsay sent to Nick. Do you have access to her files? I may also just be creating memories.

In any case I don't have a great sense of confidence in what Bill S has done so far. I'm sure his goals are good and the community seems to like him a lot but I am not in any way impressed by his solutions. I don't know how much influence we have with this but it would be nice to get it right this time.

Perhaps you Kriss and I need a call?

The national electrification strategy project is different than the one we're doing through crosbie. I guess national are pulling out of the project so it falls back to the regions to apply through fnif. Only found out today. Sorry.

Hi Erika, just a few things for you.

- FNIF application for the electrification strategy proposal. Pls give to Megan.
- confirm if you have the risk assessments for the multi units and whether the approvals are complete - I think you had a few things you wanted to add. I just need cidm for risk docs. I have the approval letters.

- on the radar is Mushuau's reno application.

Elizabeth will roll up the renos in the template for tomorrow.

That's it!

Clifford

Let's try and talk tomorrow afternoon some time - give me the time to incorporate any of your comments. Do you want to give me a call when it is convenient for you? As far as the contract goes, they did not issue me a contract so far but we have been working with the proposal that I submitted to them - though we did add additional time on the last - an adjustment as things progressed. We can discuss this as well.

I look forward to the conversation - and am quite open to your input.

Bill

Sounds good.

We should have a chat as you noted earlier. I am surprisingly open for the rest of the week so whenever it suits you.

I have a couple small thoughts on the layouts. You know Architects can't help themselves on this. It is as involuntary as a sneeze.

I assume the band will issue the tender with support from you as per your proposal and from me and INAC as necessary.
Did they ever give you that contract I wrote? It would not be hard to modify that into a construction type contract.

Regards

Clifford

All of these designs are based on using electric baseboards and wood heating. I did not mention that, my mistake. This is an approach that I would strongly recommend, but also that this should be accompanied by significant increases in energy efficient building details i.e. significantly reducing the demand side. I also did not mention that the designs are based on slab on grade construction (could also easily be with crawl spaces - but less recommended) with the intention of eliminating basements as they are a problem area. I recommend that the savings in building costs of not using a furnace etc be put into more insulation and better windows etc. and the foundation savings be put into a larger floor plan with more storage etc. In a way that is what I have done. So have a look at it with this in mind.

By the way, who will be responsible for putting out the tenders to the manufacturers for these houses?

Thanks

Bill

I'll have a look through but a quick thought on the stove. In view of the other heating issues in the community we may be looking at replacing the oil fired hot air furnaces with simple electric baseboards in the existing stock. It greatly simplifies cost and maintenance and gives better control over the rooms.

Just a thought.

Subject: Draft Designs

Cliff and all

Attached is a copy of a handout sheet that I will be sharing next week - is not quite complete but is mostly there. The design part is mostly ready. You will see that I have prepared 3 alternatives. As well on version 1 and 2 each side of the duplex is slightly different. I have done this to show some different options in order to show some different ideas - which includes being able to include one part of a design, such as exterior storage, on a different floor plan. There is nothing radical here, rather some simple gestures that I hope assist in with the evolution of housing in the community.

Each of the designs emphasizes a more open plan, places for interior and exterior storage and rooms, and larger bedrooms than in present in most houses. This latter point is to allow rooms to be used by more than one child in large families. There is also a place for a wood stove in each house and in version 1 and 2, interior room spaces that could be used for a variety of things such as storage, work rooms, or as a room for butchering animals etc. All of the plans are based on a using two 16 foot wide modules (the

maximum shipping width allowed in the Maritimes, with the length varying according to the design. This of course limits what can be done with the layout. This has taken more time than I outlined in the proposal but I thought it important to show some options. I also want to stress to the community that future plans can build upon what is learned from these. Any thoughts would be welcome.

Cliff - perhaps we could have a conversation in this later in the week?

I am also attaching a copy of the report that I put together for consultations that went on. Next week I am slated to meet with the Chief and council in St. John's on Monday and then will meet with people in the community on Wednesday and Thursday.

Subject: Re: MIFN Draft Designs

Hello,

I had a quick look at the layouts and I have a couple of concerns/questions that may impact how these units are considered. I am only providing this comments as friendly information:

1. I thought the duplexes were suppose to be 4 bedrooms and 2 bathrooms, if the options are 2 or 3 bedrooms, does this reduce the funding that they can receive?
2. Code requires wood stoves to have an exterior vent for combustible air, how is that be accomplished with the wood stove in the middle of the units.
3. Is this the safest way to orientate a hot wood stove with kids playing? Would it not be better against an exterior wall?
4. I assume the units are using electrical baseboard as primary heat and wood backup and are not using in floor heating? If electrical heat is going to be used, how much increased demand will this place on the electrical plant?
5. Where is the laundry area?
6. Where is the air exchanger unit to be located?
7. Model 2 & 3 - caution with having general storage in the middle, if there a fire could lose both units. Likely better having the storage at the ends of the units
8. Model 2 solar - where is the battery train? In the storage area, how much space will be lost and who would maintain this?
9. Model 1 - just to change the orientation of the tub to ensure plumbing is away from exterior walls
10. As these units appear to slab on grade, there has been a number of issues related to losing heat and having the pipes freeze and break under the slab resulting in the heaving of the slab. Was consideration given to utilizing crawl spaces?
11. The Units do not appear to have barrier free access, need to verify the dimensions of the entrances/exits.

*Released under the Access
to Information Act*

*Communiqué en vertu de la
Loi sur l'accès à
l'information*

12. Does the proposed storage units fulfill the anticipated use? working/storing on snowmobiles, hanging animals, general storage? The smaller storage areas might be of concern.
13. Are there any cost estimates?
14. Fridges are not generally located against a wall in direction that the door opens.
15. How was it established that they would use the wood stove when they don't use the wood now?
16. Is there any concern with noise for the bedrooms as the bedrooms are off of the main living area?
17. These appear to be modular in construction which limits configuration, was consideration given to pre-fab walls with on-site erection? This would allow for more freedom in design.
18. Was there a cost assessment completed to determine value for money between modular and pre-fab? or evaluation of employment opportunities with different construction approaches?
19. Suggest that any storage areas within the living area may not require windows.

Hello,

Can you forward me the comments that were forwarded in relation to the initial multiplex designs?

Thanks!

Hello,

Over the last couple of months, I've been providing capital support to MIFN after Lindsay's departure. As of this week we are fully staffed in the unit and I was able to re-distribute the portfolio. Erika McCallum, Capital Officer, has been assigned MIFN and I'd ask that she be included in correspondence and meetings going forward. Over the next couple of weeks, we'll be doing a handover.

Her contact info is 902-661-6252, (c) 902-69-1102, erika.mccallum@aandc.gc.ca

I'll remain involved working with everyone to advance the MAP, infrastructure working group, once that's operational, as well as emergency management.

A letter will be sent to formally announce the change; however, I just wanted to give a heads up in advance.

Regards,
Di

Good Day All;

Please see the attached report: I will send the individual HRV & Furnace Inspection reports separately as they are large zip files.

Regarding the furnace replacement at the arena and repairs at the band council office: The Astron is currently at Goose Bay due to wind. Once this run is complete, the next run is dedicated to Natuashish. The furnace and other materials are in Lewisporte waiting to be loaded. As soon as the freight arrives, we will have Rod & his helper on site (preferably same day or next) to complete the install and repairs.

Hi Erika

Anything new on this one?

I was having a think about the plan and although it does not address much in the way of indigenous design it seems to be the only current option.

I think it could be modified to make it a bit better but I don't know where they are with their talks with the supplier.

I've attached a couple of minor thoughts that you may want to forward to whomever at the community.

Hi Erika

They seem to have answered most everything.

They mention their NSDC crew. Do we know how many folks that is? There will be a lot of difference in a foreman plus 6 locals vs a half dozen experienced tradesmen plus some locals.

If this is all correct the only add ons for the community would seem to be at least these:

-All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI. Does not include any delays, storage or unforeseen delivery issues.

-Electrician to be provided by community, panel mast/ underground connection and any water and power meters supplied and installed by community electrician.

-Building services are the responsibility of MI to the building perimeter, connections to sewer, water and power from building perimeter to interior by NSDC

-Equipment assumes the community has a backhoe, loader, excavator, zoom boom and forklift (both with

*Released under the Access
to Information Act*

*Communiqué en vertu de la
Loi sur l'accès à
l'information*

fork extensions) and flat bed truck and trailer all in good working condition with qualified operator(s). Assumes fuel is available in the community
-Assumes 6-8 skilled community members at all times (that live in the community) at \$18/ hour (2-3 per house). Doesn't factor any training budgets or wage subsidies. Should NSDC have to bring in outside workers due to labour deficiencies costs will increase and billed to the project.
- Does this mean they pay the local labour \$18?
- (it would be good to have an outside labour rate established before they start)
- Final landscaping are not included in NSDC scope

- "Rear door at grade". Not sure how this works if the standard detail says only 5' of backfill allowed on the basement wall but I guess we will see in the final submission. He does say stairs are included so if one becomes necessary then I guess it will not be extra.

- Re the windows. He says meets the NECB. I am curious about double glazed sliders as the ideal solution. Casements will always seal better than sliders. Codes are always considered the minimum requirement and I would suggest we should be exceeding code minimums, especially in the windows and doors. Do we have brand names of the supplier in the specs somewhere?

He mentions an Aug 21 agreement. I have the Aug 01 set you sent me. Is there more?
"As per project specifications sent". Do you think this is also the Aug 01 set or something else?

They seem to have experience in the North. Notes like equipment in working condition and having fuel available tells me they have had such issues in the past and learned from them.

That's all for now I guess.
Regards

Hi Erika,

Please find attached the comments you requested. I am not sure if you have seen the packages I sent to Chief and Nick as most of what you are looking for is in them. Nick, if it is ok, can I send Erika the packages?

In a nutshell, we are working from the assumption that the lots are generally ready to construct on and the services are run to each lot. We will take it from there to completion up to a general final lot grading.

Erika, rest assured that we have a very good handle on the project and our team is very experienced in executing projects such as this one. MI is in good hands and we will ensure that the project is a success.

Let me know if you have any further questions.

Thanks Erika.

Steve

Subject: Duplex Project
Hi Nick,

Further to receipt of the information provided by Steve Marshall, Northern Shield, the documentation was forwarded to Public Works & Government Services Canada for their review and feedback, as has been the practice with housing projects resulting from Budget 2016.

Please note the following summary of that consultation:

- * Are shipping costs from Ontario (the address of Northern Shield) or Edmonton, AB (the address of Magwall Building Systems)? Please provide the cost breakdown for transportation.

- * As per specifications sent for the project :

- * -All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI.

- * Who will provide warranty, Northern Shield or Magwall?
- * Northern Shield provides the warranty on the build and any subtrade or product warranty is passed on to customer (appliances, materials, windows etc)
- * For clarity, Magwall is our SIP panel manufacturing company and are not directly associated with the project. Everything is under NSDC.
- * Please provide roof details.
- * To follow with full engineered plan set
- * Will all openings (windows and doors) be factory framed into the panels or framed on-site from pre-cut pieces? Concern is noted that, if the latter, site labour will need to find the correct parts (possibly in the snow) and nail them together in the right order.
- * For the Duplexes the windows come in installed in the units as they are shipped as modular units, for the bungalow the windows and doors will be cut on site by NSDC crew who are very experienced with the products and installation details as well as the remote community setting and extreme weather conditions.
- * Concern is noted for the tremendous amount of site labour and high potential for error due to the requirement of precise assembly details (i.e., if lumber is cut incorrectly or damages MAG board material). What contingency plans are in place to mitigate risk?
- * For all remote projects we do include a material contingency for some items (ie ship some extra panels) also the site coordination critical items are managed by NSDC crew for accuracy.
- * Submitted drawings (from 2016) are for a project in Ontario. As code items vary from place to place (especially with regard to wind and snow loading requirements), please forward a design for Natuashish and a local Engineer stamp.
- * This will be completed once project is fully awarded (signed contract) and we can engage the local P.Eng stamp for review, no concern from NSDC as we design and build in different provinces to different codes and different countries to international codes.
- * Please identify all 'by others' (i.e., fascia and gable trim, drip edge, gutters and basement support posts, etc.).
- * AS noted in the specifications submitted :
- * Notes, Assumptions & Exclusions; Community to provide the following:
 - * -Site plan details on lots, sizes, municipal approvals and regulations.
 - * -Flat, leveled and cleared sites.
 - * - Service Connections for hydro, water and sewer for the building connections. Estimate assumes sites are serviced with utilities at the curb.
 - * - Equipment assumes the community has a backhoe, loader, excavator, zoom boom and forklift (both with fork extensions) and flat bed truck and trailer all in good working condition with qualified operator(s). Assumes fuel is available in the community. All provided at MI costs. Down time and costs of replacement equipment and associated costs not included and subject to price increase.
 - * - All permits, site engineering, access to lots, maintained roads, snow clearing services, waste removal.
 - * Civil work allowance: assumes basic work required on site to clear and generally level the lots, run water, sewer lines, excavate basement, backfill and grade for final landscaping by the community prior to unit arrival.
 - * Notes: Assumes 6-8 skilled community members at all times (that live in the community) at [redacted] hour (2-3 per house). Doesn't factor any training budgets or wage subsidies. Should NSDC have to bring in outside workers due to labour deficiencies costs will increase and billed to the project.
 - * -All associated project transportation costs are included to deliver materials and components to Goose Bay or designated port(s). Ocean shipping by MI. Does not include any delays, storage or unforeseen delivery issues.
- * Please identify roofing material. Details only show panel construction. Does community have to supply/install shingles/metal? Can roofing be nailed into the roof panel system
- * Previous project files that were sent for reference included panel roof details. For the current project : Duplexes and the Bungalow the roof will be as stated in the specifications (attached for reference) Wood Trusses , roof sheathing will employ FRP Entertec SIP panels with embedded solar roof package and conventional plywood, connection materials and consumables, shingles and labour included in pricing.
- * Roof details all show sloped SIP panels which imply sloped finished ceiling. Is there to be a flat ceiling of some sort? If so, is labour and material included?

- * Previous project files that included a lofted / sloped ceiling sent as reference drawings. For this project the roof and ceiling construction will be as stated in the specifications (attached for reference).
- * Are labour and material for 5-6' exterior stairs included?
- * Yes, materials and labour for the front wood porch and stairs to grade as required. Rear door at grade. Pricing does not include any decks but does cover stairs and required landings.
- * Back slope away from the house to be a minimum of 1 in 12 will be difficult to obtain on all sides of the structure.
- * Where is the reference to the 1 in 12 slope? If it is in our details it is an oversight.
- * Final landscaping are not included in NSDC scope - we have no details on the sites, topo etc. However, we will ensure the units are backfilled and sites are graded to slope away from the houses.
- * Foundation sections show a gravel footing which only works if the material below it is solid and undisturbed.
- * Previous project files - sent as reference drawings only. Foundation details are being reviewed for location and code requirements by P.Eng. As per project specifications sent : Supplied and installed by NSDC - Magboard SIP foundation wall panels on concrete footing, Connection materials, wrap and consumables, PWF wood for foundation floors with insulation board as required (or approved equivalent) Note: aggregate for foundations not included. Supplied by others. Assumes no weeping tile.
- * Foundation sections show the floor panels sit directly on the subsoil which will require grading of the gravel to be exactly level and all services (water/sewer/power) needs to be in place before the floor goes down. Detail also notes 'optional' foam insulation under the floor. Is that included in the package and who installs?
- * Previous project files - sent as reference drawings only. Foundation details are being reviewed for location and code requirements by P.Eng. As per project specifications sent : Supplied and installed by NSDC - Magboard SIP foundation wall panels on concrete footing, Connection materials, wrap and consumables, PWF wood for foundation floors with insulation board as required (or approved equivalent) Note: aggregate for foundations not included. Supplied by others. Assumes no weeping tile. Building services are the responsibility of MI to the building perimeter, connections to sewer, water and power from building perimeter to interior by NSDC.
- * No indication of waterproofing between basement wall and basement floor. Typical details do not show exterior perimeter drains which will most likely be required.
- * Foundation details are being reviewed for location and code requirements by P.Eng and will be built accordingly/to code.
- * Standard details show vertical holes in panels for wiring installation. Are the holes placed relative to an electrical plan or are there just two per panel as shown? Some details show matching holes in the top plates. Are the holes in the plates pre-drilled or drilled on site?
- * Panels ship standard from supplier with (2) electrical chases in each panel for electrical runs, top plates are drilled on site as required.
- * The submitted Magwall plans show 2" x 8" construction. Is that what is included in the current proposal?
- * Yes the panels are 8.25" thick, this is also required to meet the R values as per NBC.
- * Are the windows triple glazed?
- * As per project specifications sent : Supplied and installed by NSDC - windows shall meet the requirements of Zone 7 and the U value requirements of the NECCB. Double glazed, slider windows, with Low E argon gas, vinyl clad with insulated spacers is anticipated. Windows shall be insulated at the perimeter with low expanding foam.
- * Does the proposal include supply and install for gear like HRV, water heater, bathroom fans, appliances, kitchen hood, electrical panel mast, water and power meters, etc.?
- * As per project specifications sent : Heating and Ventilation section, HRV included in design and pricing, Water Heater 40 gallon included in design and pricing, bathroom and kitchen fans included, appliances - fridge stove washer and dryer., electrical - main panel with circuit breakers included and install, Assumes Electrician to be provided by community, panel mast/ underground connection and any water and power meters supplied and installed by community electrician.
- * Is the cost of excavation, site servicing, installation of underground lines, hook ups for water/sewer/power, driveway gravel, curb cuts at the street included?
- * See above notes in reference to Exclusions for underground lines, hook ups for water/sewer/power, driveway gravel

*Released under the Access
to Information Act*

*Communiqué en vertu de la
Loi sur l'accès à
l'information*

* See notes to agreement issued Aug 21 to MIFN - Civil work: Assumes basic work required on site to clear and generally level the lots, run water / sewer lines, excavate basement, backfill and grade for final landscaping is complete at MIFN costs. Landscaping not included.

* Do these plans have 'winter lobbies' (arctic entrances), cold porch for winter use/storage, space for country meat prep and large pantry for supplies coming in via boat?

* Yes - as per attached concept plans submitted.

Please provide us with Northern Shield's response to these comments/questions as soon as possible.

Can you tell me the status of the project? Has MIFN signed a contract with Northern Shield?

As previously indicated, INAC wants to ensure that these housing funds are best utilized to serve the community and that new infrastructure is code-compliant, appropriate for the climate and will serve to increase current housing stock with infrastructure that will have a suitable life span.

Thanks so much,

Erika McCallum

Subject: Re: Mushuau Innu First Nation - Q1 Fuel Reporting

That's unfortunate re: their payment.

Perhaps we can speak about outstanding reporting when you're back and I get through what I have. Maybe we can develop a process to ensure all reports are submitted in a timely fashion to have it not become such an overwhelming task and one that has a negative impact on the FN's assessments.

Safe travels.

Hi Erika,

Northridge has absolutely been paid in full. The last payment was issued to them on March 7, 2017.

I'm rather surprised Phil had not submitted a report on that one yet. I leave to go to Natuashish in about an hour to attend their AGM this week, so that limits my ability to do much else other than travel and sit in meetings for the rest of the week, but getting my arms around all of the outstanding INAC reporting is near the top of my to-do list. I will hopefully get some traction on that next week.

Regards,
Allan

Hi Allan,

I have several reports to review that Phil submitted however will keep you informed with my progress (having issues matching e-mailed invoices with hard copy DCI's).

I do have a favour to ask of you. Reporting on Amendment #6 from 2016/17 for Boiler Replacement/Furnace Inspection is outstanding from 2017/03/31. The contractor is Northridge

Developments Ltd. Mechanical Contractors.

Can you tell me if they've been paid in full? The reason I ask is because the assessment is grossly insufficient and if they have not been paid, I would like to contact them about the product they produced.

If you could let me know as soon as possible, that would be great.

Hi Erika,

I don't think we've spoken directly before but I'll be moving in to deal with most of the items Phil Clarke was responsible for, particularly reporting. I've been on the file since PwC began the engagement so I don't have too much new to learn on the MIFN side, but it may take some time for me to understand the nuances of certain INAC reporting that Phil had traditionally worked on.

I've attached the Q1 fuel report in both PDF and Excel format. Eligible expenses are \$827 k. I am familiar with this report (I designed it and prepare it quarterly), so feel free to drop me a line if you have any questions.

Thanks,
Allan

Subject: Mushuau Innu First Nation - Q1 Fuel Reporting
Attachments: MIFN - FY2018 Fuel Reporting INAC - Apr-Jun 17.pdf; MIFN - FY2018 Fuel Reporting INAC - Apr-Jun 17.xlsx

Hi Erika,

I don't think we've spoken directly before but I'll be moving in to deal with most of the items Phil Clarke was responsible for, particularly reporting. I've been on the file since PwC began the engagement so I don't have too much new to learn on the MIFN side, but it may take some time for me to understand the nuances of certain INAC reporting that Phil had traditionally worked on.

I've attached the Q1 fuel report in both PDF and Excel format. Eligible expenses are \$827 k. I am familiar with this report (I designed it and prepare it quarterly), so feel free to drop me a line if you have any questions.

Thanks,
Allan

Jim,

I've made contact with Hydro and have a meeting arranged with them in them at their regional office in Goosebay Tuesday Morning before my flight to Natuashish. I've also arranged to meet them at the generating station Wednesday.

I've been advised that Terry Burt and Bill Ferguson will be available both days. Nick Paradisis will be available Wednesday alone and Cajetan Rich will be unavailable.

Other than census info, PSPC has the housing report through Cliff. Emily, does PSPC have the report?

Victor is Cliff's colleague and needs the report for another study. I think Cliff is away.

Erika, can you pls contact Nick, Bill and Phil re the furnace report.

I know the reports are important for the visit but delaying may turn out to be a longer delay than we all wish given activities in the community. I think we can get you the housing study and worst case scenario, furnace report while in Natuashish.

Hi Neil,

Thanks for the e-mail. Diane and I are trying to find that information for you. I believe you already have the community contact information but I am copying the info below. Once we have sent the reports to you, I would suggest to touch base with him in order to narrow down dates and availability and try to get any other info that may be missing. Once that has happened you can share the agenda with all of us and coordinate visit.

Diane - I think it would be prudent to let the community know that the trip will not happen next week if the reports have not been received to date. Thanks

Hi Victor,

Fred Earle, P.Eng. will be leading the community visit and consultation, under my direction. Please copy both him and Dean Hopkins on all project communications.

Per the last meeting minutes (attached), the site visit and consultations were to be arranged after receipt of the furnace and housing assessments. We have not seen them. Have these been received?

We have a proposed itinerary and agenda drafted. We can circulate these after we firm up the exact date for the site visit and consultation which I suggest will be Mid May to give parties time to plan. We should circulate the itinerary and agenda to all relevant parties, after you guys approve of it.

Many Thanks!

Neil

Jim

The trip will not be next week, we will aim for the following week however we will have to secure travel arrangements first. We will advise a potential date when we have a better handle on flight and hotel availability.

Thanks
D

Hi Victor,

Fred Earle, P.Eng. will be leading the community visit and consultation, under my direction. Please copy both him and Dean Hopkins on all project communications.

Per the last meeting minutes (attached), the site visit and consultations were to be arranged after receipt of the furnace and housing assessments. We have not seen them. Have these been received?

We have a proposed itinerary and agenda drafted. We can circulate these after we firm up the exact date for the site visit and consultation which I suggest will be Mid May to give parties time to plan. We should circulate the itinerary and agenda to all relevant parties, after you guys approve of it.

Many Thanks!

Neil

Subject: Mushuau

Hi Erika,

I'm thinking we need a bit of a workplan for Mushuau. Could you create a "to do" list or ongoing task list for us to review at our bi-lats. Not everything is lead by us but we'll have a part to play.

ie:

- consult with Andree to develop options for TPM and/or some other form of co-management along with costing
- housing schedule. When you inform them they are funded, the letter should also clearly state the timelines that must be met and construction complete this fiscal as the funding sunsets. Waiting for the symposium will be too late.
- on-going tracking of reports and proposals for funding
- we need to discuss attendance at the housing symposium
- I'll be asking Bill for a sub plan on emergency management to include as part of yours.

other...

thanks!

Hi Lindsay,

Thank you for this breakdown. I am finalizing my meeting folder for next week. Can I include the version you sent on the 12th?

Thanks,
Stacey

>>> Lindsay Cary 1/12/2017 9:56 AM >>>
Good morning,

This is what I've put together for MIFN. Erika and Kriss- We should discuss to make sure we're submitting the same information for both Innu First Nations.

Tom - Does this look okay to you?

Stacey - Just so you know we are working on this and will have the final version to you tomorrow.

Have a great day,
Lindsay

Hi Diane,

This is what I put together for Stacey Kazaan. From my notes, Eric Coombs requested a breakdown of Capital funding and its intended purpose.

This is a case where I wish our terms and conditions were more prescriptive. Right now, MIFN uses [REDACTED] of their Capital funding for salaries and, while a portion of the funding can be used for salaries, it would be good to see that funding used to maintain their Capital assets.

We've had that conversation with Council and their co-manager but we need to continue the discussion. We also need to talk about the appropriate number of staff required to run their Infrastructure program. Kriss can provide guidance in that area.

Lindsay

Hi Erika, the meeting you asked about is MLG and this afternoon.

What's required today is this attachment completed for Sheshatshiu and MAMU (Lindsay could answer questions about where she pulls the info if you need help) as well as core budget allocation for MAMU.

Hi Fred,

Sorry for my late reply. Thank you for the submittal, we will start reviewing this week. I am not sure if you may know but Jim Wilcox retired at the end of June, as a result I will be taking over the PSPC – Project Management responsibilities for this project. Also, Jim Tucker who is an electrical technologist with our group will take over for me as the electrical resource. Jim has a vast experience with setting up, maintaining, and commissioning generators throughout his various roles with DND and PSPC. We will try to set up a meeting for next week to discuss the report and then provide written comments to you. I know this is a very popular vacation time so I am unsure if everyone will be available. Jim will contact the group to see if everyone is available next week. Thanks,

Victor

Good Morning All:

Due to the conflicts for several of our meeting participants I will be re-scheduling our conference call (meeting) for 10:00 August 09/2017. I do understand that this time of the year is somewhat dedicated to holidays and it may be a little difficult getting all parties together but we will try. For those who have already received a meeting invitation for 13:30 on August 09/2017 please ignore as the new time will be as previously mentioned.

Thank you in advance for your support in this matter.

Agenda:

1. Introductions
2. Discussion on Natuashish Electrification Study Phase 2 2017
3. Site existing power systems
4. Current Power concerns/issues
5. Recommendations
6. Cost concerns
7. Proposal going forward
8. Round Table

If anyone has anything to add to the Agenda please feel free to do so.

Hello Jim,

In advance of the meeting to discuss the Phase 2 Electrification report, I have the following comments that I would request Crosbie address/update in their report. We can discuss these items during our meeting. More importantly, I am not sure of the value for money this and the last report have provided as much of the information presented was already known by staff or is readily available by Nalcor. This report seems to provide only very general information which is not reflective of the intent to investigate the electrification situation in Natuashish. I would not support any further activity be advanced on this item until a proper plan is developed.

Comments specific to Phase 2 report:

Executive Summary:

The statement that heating is "*primarily provided through oil fired furnaces*" needs to be re-worded to reflect the proper context. The original approach for the community was to have the houses use oil/wood as their primary heating source, however this is not the practice. Heating is primarily by use of space heaters/stoves, etc.

2.1 Isolated Diesel Generating Station

Clarify that the peak demand of "1,731 kW leaving a spare capacity of 556 kW" is under N-1 conditions as the plant total capacity is 3,232 kW.

When is the last time load shedding was done? There has been no incidences in the last 4-5 years.

2.2 Electrical Metering

Need to correct context of the statement "The meters are read for record purposes". Residential meters are not read.

When is the last time the residential meters were read? What level of detail does Nalcor have for the commercial and lift stations meter readings?

2.3 Comparison to other Communities

This presents generalities already known. What specific variances/issues were identified that are unique to Natuashish? For example Natuashish uses 1.5 more fuel than Nain. What are the reasons for this variance? Does Nain use electric heat, oil, wood? What is the volume of fuel that Nain uses each year? Are their houses better maintained? Do homeowners in Nain pay for fuel oil? Do they pay for power or does the Inuit government pay? Is this consistent with other communities along the coast? etc.

2.4 Issues and recommendations

What does a new automation system do for improving efficiencies and costs? Any ability to identify efficiencies? Improved optimization will improve operations by #%? No substantiation provided as to why this should even be considered. INAC has talked to Nalcor on this issue and they verbally provided a rationale for supporting this. Include rationale.

What value does a 1200 RPM generator provide? % reduction in fuel consumption? % reduction in maintenance? As above, discussed with Nalcor. Provide rationale/reasoning.

Heat Recovery system, does this refer to the heat recovery system located in the back room?

The Generators do not provide enough radiant heat to protect the building from freezing?

What is Nalcor's position on the heating recovery issue?

3.2 Electrification within the Community

What buildings are 20 years old? Community moved in 2002, this would make most buildings 15 years old.

No sure what the purpose of this section other than stating a 200 Amp service is sufficient for electric baseboards.

3.4 Issues and Recommendations

Appendix A was not attached.

The statement "continuously replacing fuel pumps" appears to contradict the low residential fuel oil

consumption and limited use of the oil furnace in the community. Based on actual fuel consumption only approximately 20% of the furnaces would be used as the primary heat source. What does "continuously" mean under this situation?

Furnaces should last at least 20+ years, why is that not happening here?

Given the community's capacity issues with undertaking proper maintenance how does a district heating system succeed?

Where has a district heating system been used in remote northern community? Not aware of a community district heating system in Northern Canada?

Alternate energy options - what has been current explored on this issue? Apparently Nalcor has completed studies on this issue and the Inuit Government.

4.0 Study Recommendations

How does "Further study and analysis would be required to provide a detailed cost estimate and cost benefit" address the question "Provide cost estimate and feasibility to switch all the existing residential oil boilers/furnaces to electric heat. How does it compare to the existing demand? How does it affect the Generator Power Plant?"

4.1 Install Occupancy Sensors, LED Lamps and Thermostats

How is a recommendation for a \$200,000 expenditure present without any substantiation? What is the energy saving (% or \$) over fluorescent bulbs or stand bulbs?

How does programmable thermostats benefit a community that does use oil as its primary heating source? Is there literature that shows what savings could be accomplished? Would this savings require that houses are repaired (i.e. weather stripping replaced, windows, etc.)?

4.3 Replace Furnace and Tanks

The proposed cost of \$10,000,000 works out to approximately \$47,000 per residence. This is not reasonable - an explanation is required as this cost would be expected to be \$5-6,000 per residence.

Should this recommendation not be connected to a discussion as to what is sustainable as a maintenance issue for the community?

4.5 District Heating System

What is the basis of the \$10,000,000 cost estimate? Provide the substantiation for this estimate.

Should this recommendation not be connected to a discussion as to what is sustainable as a maintenance issue for the community?

See comments under Section 3.4.

4.6 Install Alternate Energy Sources

What is the basis of the \$5,000,000 cost estimate? Provide the substantiation for this estimate.

Should this recommendation not be connected to a discussion as to what is sustainable as a maintenance issue for the community?

Hi Fred,

Sorry for my late reply. Thank you for the submittal, we will start reviewing this week. I am not sure if you may know but Jim Wilcox retired at the end of June, as a result I will be taking over the PSPC – Project Management responsibilities for this project. Also, Jim Tucker who is an electrical technologist with our group will take over for me as the electrical resource. Jim has a vast experience with setting up, maintaining, and commissioning generators throughout his various roles with DND and PSPC. We will try to set up a meeting for next week to discuss the report and then provide written comments to you. I know this is a very popular vacation time so I am unsure if everyone will be available. Jim will contact the group to see if everyone is available next week. Thanks,

Victor

Other than census info, PSPC has the housing report through Cliff. Emily, does PSPC have the report?

Victor is Cliff's colleague and needs the report for another study. I think Cliff is away.

Erika, can you pls contact Nick, Bill and Phil re the furnace report.

I know the reports are important for the visit but delaying may turn out to be a longer delay than we all wish given activities in the community. I think we can get you the housing study and worst case scenario, furnace report while in Natuashish.

Hi Neil,

Thanks for the e-mail. Diane and I are trying to find that information for you. I believe you already have the community contact information but I am copying the info below. Once we have sent the reports to you, I would suggest to touch base with him in order to narrow down dates and availability and try to get any other info that may be missing. Once that has happened you can share the agenda with all of us and coordinate visit.

Diane - I think it would be prudent to let the community know that the trip will not happen next week if the reports have not been received to date. Thanks

Hi Victor,

Fred Earle, P.Eng. will be leading the community visit and consultation, under my direction. Please copy both him and Dean Hopkins on all project communications.

Per the last meeting minutes (attached), the site visit and consultations were to be arranged after receipt of the furnace and housing assessments. We have not seen them. Have these been received?

We have a proposed itinerary and agenda drafted. We can circulate these after we firm up the exact date for the site visit and consultation which I suggest will be Mid May to give parties time to plan. We should circulate the itinerary and agenda to all relevant parties, after you guys approve of it.

Many Thanks!

Neil

Subject: Re: First week in May trip to Natuashish

Other than census info, PSPC has the housing report through Cliff. Emily, does PSPC have the report?

Victor is Cliff's colleague and needs the report for another study. I think Cliff is away.

Erika, can you pls contact Nick, Bill and Phil re the furnace report.

I know the reports are important for the visit but delaying may turn out to be a longer delay than we all wish given activities in the community. I think we can get you the housing study and worst case scenario, furnace report while in Natuashish.

Hi Neil,

Thanks for the e-mail. Diane and I are trying to find that information for you. I believe you already have the community contact information but I am copying the info below. Once we have sent the reports to you, I would suggest to touch base with him in order to narrow down dates and availability and try to get any other info that may be missing. Once that has happened you can share the agenda with all of us and coordinate visit.

Diane - I think it would be prudent to let the community know that the trip will not happen next week if the reports have not been received to date. Thanks

Hi Victor,

Fred Earle, P.Eng. will be leading the community visit and consultation, under my direction. Please copy both him and Dean Hopkins on all project communications.

Per the last meeting minutes (attached), the site visit and consultations were to be arranged after receipt of the furnace and housing assessments. We have not seen them. Have these been received?

We have a proposed itinerary and agenda drafted. We can circulate these after we firm up the exact date for the site visit and consultation which I suggest will be Mid May to give parties time to plan. We should circulate the itinerary and agenda to all relevant parties, after you guys approve of it.

Many Thanks!

Neil

Hi all,

Wanting to confirm your availability (Chief and/others as necessary) nearing the end of next week to commence discussions about immediate repairs to the school (over the summer months).

I will be in Natuashish at the beginning of the week.

Look forward to hearing from you.

Erika

Thanks Emily. I will look at the scope of work and see if there is additional information that would fall within or inquiring about adding. I wasn't sure if you had the capacity to provide info re: viability of existing foundations but I may be able to have our engineer assess.

Also wondering about confirmation of hydro meters on the housing stock. Don't remember if that info is contained in your report.

Thanks!

Subject: Re: Mushuau Housing Assessment

Good morning Erika,

I was hoping all groups would have comments on the draft, and was planning on incorporating those into the next revision to be presented at the Housing Symposium late June. Does INAC have any comments to include? Does that timeline work for you, or would you like to see the revised document prior to the Housing Summit?

Emily

Thanks for this Tom. I suspect Nat may have been part of that study. Certainly there were MIFIN reps who travelled to Australia investigating the product around that time, and Dr Michael Jong was involved in related research. Health Canada was aware of, but not involved with the project, it was community led and owned.

I will try to reach Dr Jong to see if he has any more information. He is retired now, but I know where he lives ;-)

re Opal Gasoline

As an action item from the call on Wednesday, I have been in contact with British Petroleum (BP) Australia, who developed Opal Gasoline, a low aromatic fuel. This product was developed for the Government of Australia in 2002, as that country was experiencing serious issues of solvent abuse, primarily gasoline sniffing, in its Aboriginal communities.

BP Australia have advised that they did ship 20,000 liters of the product to a First Nation community in 2006, as part of a study. According to BP Australia,

"The Opal fuel or low aromatic gasoline will work in the colder climates but engine starting may be harder due to the lower volatility of the fuel, however there are starting aids that can be used such as starting aid sprays or engine warmers."

BP Australia went on to advise that they will endeavor to find the results of the 2006 study. Possibly we should explore the feasibility of partnering with them to conduct a similar study in MIFN.

As far as a distributor, Sgt. Dave Simpson, O/C, Natuashish RCMP has advised he has been in contact with the Woodward Group, who have stated that they do have the capacity to obtain and ship this product.

You may wish to pass this on to Debra Keays-White at Health Canada.

Hi,

Can we talk about the audit follow-up items in this email for Mushuau? We should resolve before the next audit comes in.

tk

>>> "Philip Clarke (CA - ADVS)" <p.philip.clarke@pwc.com> 5/10/2017 6:11 AM >>>
Andree:

I am away on vacation until May 23 and not back in the office until May 31 -. I would like to take a look at the amounts before agreeing to any recovery and payment plan.

I also do not think this letter is complete and accurate.

1. It ignores any amounts INAC has payable to MIFN, including but not limited to the \$209k owing from electrification from FY16 annual report. Any operating invoices from this period remain unpaid given INAC has not yet flowed sufficient funding.

2. It ignores that the AP to NL Hydro is being repaid over time as reported to Diane Wade, Capital Officer. (Segregated from the outstanding capital and invoices subject to commercial dispute, which are for the most part unfunded.

I would suggest that we connect and deal with each issue. I would prefer to do this on my return - Make sense?

In the interim I will get someone to take a look at the recoveries and INAC AR and we can come up with a plan to resolve.

Cheers!

Subject: Re: Mushuau Housing Assessment

No, that's ok with me. I'm wondering about the additional information (i.e., occupant data, final assessment on the homes without the snow impeding visibility). As well, I'm wondering if it would be possible to include the viability of existing foundations from homes that have been burned in the construction of new homes (can they be re-built on?).

I will go through the report and provide comments to you, as well as any additional information that would prove useful in long term planning.

Thanks!

Subject: Re: Mushuau Housing Assessment

Good morning Erika,

I was hoping all groups would have comments on the draft, and was planning on incorporating those into the next revision to be presented at the Housing Symposium late June. Does INAC have any comments to include? Does that timeline work for you, or would you like to see the revised document prior to the Housing Summit?

Emily

>>> <p.philip.clarke@ca.pwc.com> 6/7/2017 9:58 AM >>>
Erika:

MIFN has received the cost estimate for the FY18 spring fuel order. Consistent with past administration of electrification, INAC has funded 100% of this payment.

Here is the trend on Spring fuel pricing - pricing being 0.04 per L higher this year than last

FY18 - 1.1032	Order volume - 2,000,000 L
FY17 - 1.0612	Delivered - 2,073,000 L
FY16 - 1.2146	Delivered - 1,886,000 L

Last year total fuel consumed (different than purchased) was 3,490,000 L. The 4 cent increase would translate into an increased total cost of \$139,600. All parties will have to adjust their budgets accordingly to compensate.

I advised Woodward's that I would not expect funding to be processed until July assuming we make the June cut-off. Note the credit terms are pre-pay. I have not heard back if this is going to be an issue.

I would request that the payment of this pro-forma invoice be processed by INAC in the normal course. Timing should be fine given that the boat is not expected to be able to get up the Labrador coast for a couple of weeks due to heavy ice.

Please let me know of any issues, and I will do the same.

Cheers,

Philip Clarke

Robert:

Thanks for sending this along. I will forward to INAC our funding partner.

As discussed on our call, I would expect that the funds will not be advanced until the INAC July payment (July 3 based on holidays) as their cut-off for that payment is June 7/8.

I trust that will not be an issue. If so please advise.

I appreciate you keeping everyone posted on the vessel's progress. Cajetan continues to be the point of contact as Director of O&M.

Cheers!

Diane/Jim:

Fred Earle, P.Eng. was onsite May 23 to May 24. There was no fire during his visit, but one occurred sometime before. We are unsure of the details.

He held several meetings in the community and is currently completing minutes for those meetings. They should be circulated by the end of the week.

The report we are preparing should be available, DRAFT issue first, by the end of the Month.

I suggest a teleconference after the minutes are completed in advance of the draft report being substantially completed. Perhaps sometime later next week?

Please let us know if that works everyone.

Best Regards, Neil

Here is a PO for an estimated 2,000,000 L of diesel fuel. I am seeking an estimate from O&M, but that was the estimate in each of the last 2 years.

The estimate of 2M litres last year was not that far off the actual of 2,073,000 L actually delivered.

The current year saw no new capacity built, and it was not a particularly harsh or cold winter. I don't see much reason to think things have changed materially.

If you could quote an estimated price it would be appreciated.

Cheers,

Philip Clarke

Subject: RE: MIFN Spring FY17 Fuel Order

Hi Phil,

As discussed yesterday (June 5th), please see attached pro-forma invoice for the Spring 2017 fuel order. Please confirm receipt, and that all is due for payment per the specified terms. If you have any questions, or require any additional information, please let me know.

As per last season, I will endeavor to provide periodic vessel updates, and provide arrival details 48 hours before reaching Natuashish so that site personnel are prepared accordingly. Reg and I will also confirm details of what we will require on arrival, so that the discharge can commence without any undue delay. I anticipate of same, would you be able to (re)confirm the appropriate contact person at O&M? I know that it was Cajetan last year, but am not sure if there have been any changes since then.

Looking forward to your confirmation, and we will be in contact again as the schedule moves forward.

Regards,

Robert L. Andrews, CPA, CMA

Robert:

Thanks for sending this along. I will forward to INAC our funding partner.

As discussed on our call, I would expect that the funds will not be advanced until the INAC July payment (July 3 based on holidays) as their cut-off for that payment is June 7/8.

I trust that will not be an issue. If so please advise.

I appreciate you keeping everyone posted on the vessel's progress. Cajetan continues to be the point of contact as Director of O&M.

Cheers!

Hi Erika,

Does capital flow this money through an amendment?

>>> <p.philip.clarke@ca.pwc.com> 6/7/2017 9:58 AM >>>

Erika:

MIFN has received the cost estimate for the FY18 spring fuel order. Consistent with past administration of electrification, INAC has funded 100% of this payment.

Here is the trend on Spring fuel pricing - pricing being 0.04 per L higher this year than last

FY18 - 1.1032	Order volume - 2,000,000 L
FY17 - 1.0612	Delivered - 2,073,000 L
FY16 - 1.2146	Delivered - 1,886,000 L

Last year total fuel consumed (different than purchased) was 3,490,000 L. The 4 cent increase would translate into an increased total cost of \$139,600. All parties will have to adjust their budgets accordingly to compensate.

I advised Woodward's that I would not expect funding to be processed until July assuming we make the June cut-off. Note the credit terms are pre-pay. I have not heard back if this is going to be an issue.

I would request that the payment of this pro-forma invoice be processed by INAC in the normal course. Timing should be fine given that the boat is not expected to be able to get up the Labrador coast for a couple of weeks due to heavy ice.

Please let me know of any issues, and I will do the same.

Cheers,

Philip Clarke

Reg / Robert:

Here is a PO for an estimated 2,000,000 L of diesel fuel. I am seeking an estimate from O&M, but that was the estimate in each of the last 2 years.

The estimate of 2M litres last year was not that far off the actual of 2,073,000 L actually delivered.

The current year saw no new capacity built, and it was not a particularly harsh or cold winter. I don't see much reason to think things have changed materially.

If you could quote an estimated price it would be appreciated.

Cheers,

Philip Clarke

Probably. Should we provide a written response to their budgets?

>>> Dorothy Smith-Bezanson 5/30/2017 8:25 AM >>>

We talked about that on the Mamu call last week. The first budget (in deficit) was passed by the board, the one with the 1.1M is in draft. I'd also like the revised draft budget - need to create our distribution of the B2016 Year 2 into the 17/18 agreement.
Dot

Hi,

Should we have an internal chat about this budget. i.e. Terms and conditions, strategic opportunities.....

>>> Roy Pike <rpik@innueducation.ca> 5/29/2017 4:10 PM >>>

I've been given the impression that you might like to have a copy of this.

It was approved at the April 25/26 board meeting.

I have a revised one as well if you like. It hasn't been approved but given that the trustees approved one with a 700,000 deficit, I don't think it would be a cerebral stretch to believe the revised one would.

Subject: Natuashish Homes
Attachments: DORA's Budget Proposal - Natuashish Homes .pdf; CCDC 5B - 2010 Con Man Contract at Risk.pdf

Hi Erika,

Sorry for taking so long in getting back to you.

See attached proposal budget for your consideration; this might look expensive for six residences, of course location carries a certain amount of risk that we wouldn't have if this was in a location that we could drive to and close to major roads. For that reason I like to also offer you a choice of doing the work with a Construction Management Contract where DORA would charge 5% fee on total value (see type of contract attached). This type of contract would take the risk away, that we now need to accept as part of doing work in Natuashish. With a CCDC 5B contract you would see all expenses and we would give you an hourly rate for our people upfront, the work is done open book; DORA would search for best prices on all equipment, materials and services and manage / supervise the work to ensure quality and best value. This will allow for a low risk construction and will provide a quality project at the best possible price.

Please feel free to call or email if you have any questions. Hope to hear from you soon,

Best Regards,

Subject: Re: Mushuau Innu FN - Potable Water Issue

Hi Bill,

Thanks for the update.

We'll be checking recent chemical water quality data in a.m.

We also see if we can obtain some water samples from the community for analysis.

Cheers

Subject: Mushuau Innu FN - Potable Water Issue

INAC has been advised of an issue related to its water supply. A report from the FN describes the water as "brown".

Potable water is being shipped to the community.

Information is sketchy at this time as the First Nation has closed its offices due a community tragedy.

Subject: Re: MIFN / Nalcor Operational Touch Point

Hi Phil,

Could you please add the following items on next week's agenda:

1. Development of agreement between Nalcor/MIFN/INAC
2. Fuel meter installation
3. Scheduled overhauls of 2068 and 2076 (June & August, 2017)
4. Arrears (\$2,316,056.43)

As well, can you add Kriss Sarson, Engineer to your list of participants to these and other phone calls relevant to MIFN Capital/Infrastructure?

Thanks so much!

Subject: MAMU WORK PLAN

Votre file - Votre correspondance

Hello Fellows!

Votre file - Votre correspondance

I was very sorry to have missed you last week Roy. But Lou, it was a pleasure hanging out with you at the airport. You should have stuck around!!

Kriss and I did meet with the Principal on Tuesday to provide him a copy of the draft assessment and Thursday to obtain his comments. He was satisfied with the report as it and Kriss will advise CBCL accordingly.

1. Roy. I still have not seen the letters you send into our office re: support to advance the work plan or the one re: funding to housing/teacher retention. Can you forward them to me?

2. Can you tell me how much the Board of Trustees has been briefed - formally - on the work plan and the deficiencies at the school? We would like to start strategizing about engaging Chief and Council re: formal agreements. I am optimistic that if we can work closely and cooperatively with SIFN to draft an agreement, completion of the same with MIFN will be much quicker as it will be very similar in nature.

3. Has your CFO started? Kriss and I talked this morning about advancing some work that can be completed over the summer months. Will he (your new CFO) be responsible for contracting out that work? If so, does he have experience doing such? Kriss and I would like to sit down with him to review departmental requirements for tendering and to ensure the work is done efficiently and effectively with value for money.

Tentatively the week of July 10 or 17 for a visit to Sheshatshiu. Would that work with your schedule?

Perhaps we can talk this week? Let me know what you think and what we can do to assist.

I hope their report is more informative as most of the information provided in his meeting minutes is already known by the region.

>>> "Fred Earle" <fearle@crobbieeng.com> 6/9/2017 4:33 PM >>>

Diane/Jim,
Please see attached meeting notes from my site visit May 16 to May 17. In addition to the meeting I did tours of various houses and facilities in the community including the school, arena, gymnasium, healing lodge, band office, water treatment facility, Hotel, Store and Warehouse.
I was accompanied by Terry Burt the town electrician for the duration of the trip. Terry had a vast knowledge of the communities existing infrastructure and couldn't have been more accommodating. The site visit was a success, a lot of great insight and information was gathered and verified on site.

Subject: RE: phase 2 electrification

Diane/Jim:
Fred Earle, P.Eng. was onsite May 23 to May 24. There was no fire during his visit, but one occurred sometime before. We are unsure of the details.
He held several meetings in the community and is currently completing minutes for those meetings. They should be circulated by the end of the week.
The report we are preparing should be available, DRAFT issue first, by the end of the Month.
I suggest a teleconference after the minutes are completed in advance of the draft report being substantially completed. Perhaps sometime later next week?
Please let us know if that works everyone.
Best Regards, Neil

Hi,

Bonjour - Hello /Bonjour

I was thinking that the week Cristina was going to Natuashish, there was a fire...

Je pensais que la semaine où Cristina allait à Natuashish, il y avait un incendie.

Were you able to complete your work? Do you have an update on how things went and when there will be a report?

thanks,

Di

Subject: Re: Mushuau Housing Assessment
Attachments: electrical meter.pdf

Hi Erika - just checking in to see if you have any comments on our report. As the meeting in Halifax was postponed, we will be doing the revisions and delivering the final report early-mid July, would love to incorporate your comments.

Regarding confirmation of hydro meters, I'm unsure what you are asking. We were asked to confirm if there is above grade electrical service, which there is, but were not asked to review anything with respect to the electrical meters. The nature of our report is architectural. Upon request, we did include some elements outside our discipline as we're happy to help out in any way we can, but also can't provide advice outside our area of expertise. I have looked through the photos I took and it appears there is evidence that the homes have an electrical meter, see attached. Does this help to answer your question?

Let me know if you'd like for us to arrange a visit to the site to inspect the homes without snow, and add this information to the report. We are planning on heading up to Natuashish at some point in August to present the results of our report. To be economical, we can potentially allow for an extra day during this trip to address your inquiry about inspection without snow. Happy to chat on the phone about this also,

Emily

Diane:

We didnt see invoices from the Province when MIFN did not have the contract for the airport.

We do have invoices for FY17.

Cheers,

Phil

Subject: Re: MUSHUAU INNU FN - OVERDUE CAPITAL REPORTS

Erika:

I sent a meeting invite for Friday June 2 here in Moncton. Some comments in advance of the meeting are noted below. We can discuss the rest on Friday. Can you please check to make sure the system is update for the reports already submitted, or if there are questions on the report they can be sent to me in advance so I can follow up. Cheers!

2015/16

2016/03/31 - Community Infrastructure and Housing Annual Report (attached)

2016/06/29 - Capital Projects Report (Fire Protection \$30,575 replacement of fire truck engine)

2016/17

2016/04/30 - Asset Condition Report System (ACRS) Projects Annual Report (attached) (16/17) - *INAC has this already. I received a copy from Theresa Leblanc.*

2016/07/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2016/08/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2016/09/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2017/01/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2017/02/28 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2017/03/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

2017/04/30 - Capital Facilities and Maintenance Program Special Initiatives Report (\$2,122,400)

All the FY17 electrification reports are complete and submitted. Last submission was May 2. The only outstanding item is the fuel slips which requires an INAC decision.

2017/01/01 - Capital Projects Report (Capacity Development \$30,000)

2017/04/01 - Capital Projects Report (Capacity Development \$30,000)

2017/01/01 - Capital Projects Report (Capacity Development-training \$100,000)

2017/03/01 - Capital Projects Report (Capacity Development-training \$100,000)

2017/01/01 - Capital Projects Report (Capacity Development-housing policy \$100,000)

*Released under the Access
to Information Act
Communiqué en vertu de la
Loi sur l'accès à
l'information*

2017/03/01 - Capital Projects Report (Capacity Development-housing policy \$100,000)

I think we do need to follow up on these ones.

2017/01/01 - Capital Projects Report (Water - under \$1.5M \$300,000)
2017/02/01 - Capital Projects Report (Water - under \$1.5M \$300,000)
2017/03/01 - Capital Projects Report (Water - under \$1.5M \$300,000)
2017/04/01 - Capital Projects Report (Water - under \$1.5M \$300,000)

I dont have any information on the water project. Have to connect with Nick and/or Bill.

2017/03/01 - Capital Projects Report (Renovations \$150,000)
2017/03/31 - Capital Projects Report (Renovations \$150,000)

This report was sent to INAC on May 2

2016/03/30 - Asset Condition Report System (ACRS) Projects Annual Report (attached)

INAC has this already. I received a copy from Theresa Leblanc.

2017/03/31 - Capital Projects Report (Maintenance Management \$75,000)
- Phase I furnace assessment, repair/replace boilers in Arena/Admin Bldg

This report was sent to INAC on May 2

2017/03/31 - Capital Facilities and Maintenance Program Special Initiatives Report (Municipal Services \$597,000) - purchase of airport equipment

This report was sent to INAC on May 2

2017/03/31 - Capital Projects Report (Electrical Systems \$20,300) - fuel flow meter

This report was sent to INAC on May 3

2017/03/31 - Capital Projects Report (Maintenance Management \$42,800) - housing assessment

This report was sent to INAC on April 26

Great, thanks for the info. It is what they referenced in our previous discussion. I think this should fall under the IWG. I would suggest NL Hydro submit a detailed proposal for the automation project, with specific phases and associated costs identified.

Glad you came to an agreement with NL Hydro. I'll await submission of the required documentation and will send out the reimbursement.

Erika:

I will jump in here and I prepared the documents for Nick's review and approval:

Automation Project

NL Hydro wanted \$20,000 to perform a study on what could be to improve automation in the plan. I action recommended by Nalcor, to be commissioned for MIFN, and completed by Nalcor. It is a budget amount for the study - no implementation costs. The stated intention was to improve efficiencies - and hopefully reduce diesel consumption and operating costs.

Cut - Outs

NL Hydro has advised that the work is required, but completion in FY18 is not possible. The purchase lead times are substantial. They plan to include this request in FY19 capital budget.

I reached out to NL Hydro. We agreed on a \$180,000 deposit.

Cheers,

Philip Clarke

Subject: Re: NL Hydro OVERHAULS -FY18

I will prepare a new amendment for \$720,000 (under electrification, but specifying that the funds are for overhauls to 2076 and 2068). The funding will be forwarded upon receipt of DCI 3866547 (2016-2017) and invoice/receipt confirming payment to Nalcor.

Reviewing the proposal submitted by Nick dated 2017/02/07, it indicates \$360,000 for each of the overhauls in addition to \$20,000 for an automation project. Nick, can you tell me what the latter encompasses. I remember Nalcor talking about automation a while back. I would like to

have additional information on this prior to review for potential funding, as well as how it relates to the bigger picture.

The second proposal, dated 2017/03/03, is a request for \$52,000 for cut outs. Phil, can you confirm that this work is not required? Phil, I think that is the information you relayed.

Related to this, but higher level, I have reached out Rick Kennedy, Nalcor further to our discussion within the Infrastructure Working Group to begin discussions regarding a formal agreement between MIFN and Nalcor. As it was identified in the Capital Work Plan as an administrative task, Kriss and I will be scheduling a meeting in the near future with them.

Erika:

Can you confirm my understanding of our conversation this am:

- Overhaul budget provided by NL Hydro is approved - \$720,000
- It will be flowed through the electrification - amendment #3
- it will be funded through an expense reimbursement process
- reporting to INAC -capital's project reporting - DCI will copy of invoice.

Hello Erika,

Please give me a call at your convenience to discuss this matter further. I think it would be best to first discuss what you have in mind so that we can draw upon the right people and resources to make good progress towards an agreement.

I look forward to hearing from you,

Geoff

Subject: Re: MIFN overhauls

Hi Erika,

I can't recall you requesting that info on the overhauls, but if you would like a history, it shouldn't be a problem just give us some time to compile it. What would be the range? All units since they were installed?

On the other item, I think the best place to start would be with our Legal department. I've cc Geoff Young, General Council and Corp Secretary in this reply, he will be able to assist you on that front..

If you need any further assistance, let me know.

Thanks

Subject: MIFN overhauls

Hi Rick,

I have a meeting scheduled for first thing tomorrow morning to discuss
MIFN's request for funding for the above.

Hoping your memory is better than mine when I ask ... did I ask you for a
history of overhauls at the plant? If so, did you provide it? If I didn't
or you didn't, may I ask now?

Kriss and I were just discussing requesting a meeting with Nalcor to
advance the possibility of creating a formal agreement. Perhaps in
September. Who would you suggest from your end be in attendance and where
would be a good meeting spot?

Thanks!

Erika / Tom:

Attached are emails received from NL Hydro looking to start the overhauls in Natuashish. NL Hydro is requesting advance payment prior to starting, which had been sent along to INAC. We have not heard back yet. Ericka is following up. We spoke today. I would not recommend that 100% is paid in advance..but suggested 50%.

If you could expedite this request it would be very much appreciated. We are running short on the time available to ship materials to Natuashish.

Cheers,

Philip Clarke

Attachments: COMMUNITY INFRASTRUCTURE AND HOUSING ANNUAL REPORT 201617 - printed.pdf; COMMUNITY INFRASTRUCTURE AND HOUSING ANNUAL REPORT 201617.pdf; COMMUNITY INFRASTRUCTURE AND HOUSING ANNUAL REPORT 201516 - printed.pdf; COMMUNITY INFRASTRUCTURE AND HOUSING ANNUAL REPORT 201516.pdf

Erika:

Attached are the housing annual reports. I have reach out to Toon to review so it maybe updated. Highlights:

- I have factored in the results of the housing study estimating that 80% of the stock need major repair. The study only looked at 52 of the community member homes and noted there were 186 available to MIFN, the rest being occupied by other residents such as nurses, RCMP, teachers, etc. The census will be key to update this report. I left the total stock at 226.

Should you have any questions please reach out to the undersigned or Toon Rich, Housing Director.

Cheers,

Philip Clarke

Our planner is on vacation this week along with the supervisor for the Natuashish operations, they are both back on Monday when I can get a sense of when the unit will be installed. The valve is in Natuashish.

Thanks

Please see the attached file which contains the invoice for the operating costs associated with the Natuashish Diesel Plant for the month of July 2017. Included with the invoice is a detailed listing of the invoiced items which have been calculated with the agreed upon overheads.

The Mushuau Innu First Nation Accounts Receivable balance as of July 31, 2017 is **\$1,995,376.60. This account is seriously overdue and we would appreciate your prompt attention to this matter.**

Original documents have been sent in the mail. **If you should have any questions or concerns with this account please contact Mr. Rick Kennedy.**

Subject: OUTSTANDING CAPITAL REPORTS/PROJECTS

Hi Bill/Phil,

I hope you're both doing well.

I wanted to send a summary of the outstanding reports/projects so we can hopefully get them cleaned up and out of the way.

I have attached the required Capital Projects Report for completion for each reporting requirement to be submitted with associated invoicing/receipts.

The following funds are in 2016/17 PAYE and will be released upon receipt of final reports:

\$75,000 of \$150,000 Housing Renovations - (six renovation projects - \$25,000/per OR three additions - \$50,000 OR a combination). The following addresses were identified on the applications:

5 Benuen St.
7 Benuen St.
19 Katshinak St.
22 Katshinak St.
66 Katshinak St.

9 Mistenapeo St.
11 Mistenapeo St.
14 Mistenapeo St.
18 Mistenapeo St.
19 Mistenapeo St.

REPORTS:

Capital Projects Report ? Mar 1, 2017; Mar 31, 2017.

Status - Complete - Uploaded to SFE site - I only had details on what was purchased. I am not aware of the asset that was repaired, but do include the attached costs. We would need to follow up with the Toon Rich, Housing Director for details. Originally submitted April 26, 2017.

*\$180,000 of \$230,000 Capacity Development - as discussed in the community last month, applications submitted for this funding indicate the following projects:

Preparation of educational materials (translation and Natuashish-specific) for residence and children regarding care/maintenance of a house and shared through a series of community meetings and classroom sessions in school - \$30,000.

Development of housing policy and Comprehensive Community Plan - \$100,000.

Contract management training, housing management training, on-site mentoring, project management training, construction oversight/education - \$100,000

*Based on our conversation, I anticipate recovery on some of this funding.

I have sent a couple of e-mails to Alex Ker to obtain population projection information Kriss discussed with her last month but have not received a response to date. As discussed, I expect that some of the capacity funding will be able to be applied against the Comprehensive Community Plan. Do you know when the final report will be completed? Have you received any invoicing to date that you can report?

REPORTS:

Capital Projects Report (Capacity \$30,000) ? Jan 1, 2017; April 1, 2017; July 1, 2017.

Capital Projects Report (Capacity \$100,000) ? Jan 1, 2017; April 1, 2017.

Capital Projects Report (Capacity \$100,000) ? Jan 1, 2017; April 1, 2017.

Status - Submitted. Uploaded to SFE site. I am not aware of any significant activity with these projects. We should discuss...can the funding be rolled into FY18...could we kick something off now?

\$10,500 of \$20,300 Fuel Meter - do you have an update on the installation of the meter? I know last time I spoke to Nalcor, they were awaiting delivery of it.

REPORTS:

Capital Projects Report ? Mar 31, 2017.

Status - Still not installed. Uploaded to SFE site. Part is on order.

\$70,000 of \$100,000 Water Assessment ? Kriss advises this assessment should be completed this month. Please submit outstanding reporting.

REPORTS:

Capital Projects Report ? Jan 1, 2017; Feb 1, 2017; Mar 1, 2017; April 1, 2017.

Status - I have not been involved with this project and have no details with which to file a report. Kris - Can you give me a call on this?

\$21,400 of \$42,800 Housing Assessment ? have you received final invoicing from Fougere Menchenton? I have been back and forth with Emily to provide INAC's comments on the assessment but have not yet had the opportunity.

REPORTS:

Capital Projects Report ? Mar 31, 2017.

Status - Reports uploaded to SFE. No final invoicing yet - at 90% complete.

\$0 of \$25,000 Window Screen Replacement ? were you able to get in touch with the company hired for fabrication/installation? Do you have a completion date?

REPORTS:

(DCI#4548549) Activity and Expenditure Report - Jun 29, 2017.

Status - I have not been involved with this project and have no details with which to file a report. Kris - Can you give me a call on this?

\$0 of \$75,000 Furnace Assessment/Boiler Replacement ? Has it been completed? Have you received final invoicing from Northridge Developments on this project?

REPORTS:

Capital Projects Report ? Mar 31, 2017.

Status - Reports uploaded to SFE. Final invoice received.

\$0 of \$11,994 Fire Assessment ? Please submit outstanding reporting.

REPORTS:

(DCI#4548549) Activity and Expenditure Report - EM - June 29, 2017

Status - Reports uploaded to SFE.

\$0 of \$597,000 Airport Equipment ? Please submit outstanding reporting.

REPORTS:

(DCI#3866547) Capital Facilities & Maintenance Special Initiatives Report - Mar 31, 2017.

Status - Reports uploaded to SFE.

There are also submissions (4 of 8) that have been received for fuel but do not contain the required Capital Facilities and Maintenance Program

Special Initiatives Reports (DCI#3866547). Please let me know Phil if you are able to meet with Kriss and I to hopefully come to some resolution on this issue, as well as other issues pertaining to Nalcor/NL Hydro.

Status - Reports uploaded to SFE.

Finally, there are the Asset Condition Report System (ACRS) Projects Annual Report (Apr 30, 2016; Mar 30, 2017) and Community Infrastructure and Housing Annual Report (Mar 31, 2016; Apr 31, 2017) that are overdue. Phil, please let me know if you need me to send these to you again for your completion.

I'll be on vacation after Friday, July 28 for two weeks. Please contact me prior if there is anything you would like to discuss.

I think that's enough for today.

Have a good evening!

Erika:

I have sent the ACRS reports off to Cajetan to update. I do not have sufficient information to update them. Cajetan is copied on this email and can be reached at 709-478-8933. May I suggest that the capital working group review this report and provide an update. That group is in the best position, outside of Cajetan, to provide an update.

I have updated the 1617 report to note those items I understand have been addressed - fire inspection, store warehouse extension, healing lodge furnace repairs and certain investigations requested.

Cheers,

Philip Clarke

Subject: MIFN Project Report - P004376- Housing Assessment (via
Notes)

To Whom This May Concern:

Please find attached the above note project report to March 31, 2017. The project is not yet complete - as the report is in draft.

[attachment "Fougere Menchenton Interim Invoice and Expenses.pdf" deleted by Philip Clarke/CA/FAS/PwC] [attachment "DCI MIFN P004376.PDF" deleted by Philip Clarke/CA/FAS/PwC]

A copy of the draft report is too large to email. It will be sent by mail.

Diane:

I assume this project will need an unexpended funding plan to be approved.

My inclination is that this is straight forward - the consultant will complete her work in Q1 FY2018. Do you need anything formal on this project beyond the email? In the past we had just provided a letter to INAC outlining the plan.

Cheers,

Philip Clarke

Hi Phil,

After some digging in purchasing, the Meter is on route to us today from the supplier, FYI. Installation would be probably 3-4 weeks after we receive it as specialized installation and setup is required.

Subject: MIFN Fuel Meter

Rick:

Can you get us a status update on the fuel meter? INAC funded \$20k, paid NL Hydro a deposit of \$10k. The funding is set - meaning it had to be spent in FY17.

It would be useful to have a status update in order to sort this out with INAC.

Erika - FYI.

Cheers,

Philip Clarke

Erika:

Thanks for speaking with me today (again) on NL Hydro. Here is their request for advance payment on the cut-outs. The FY18 MIFN budget request was for \$52,000.

I would never agree to 100% advance payment. But I would be ok with 25% and balance on completion.

As agreed - let me know when your available this week to connect on these requests. Can you confirm receipt of this email. I want o make sure you received this, and the attachment.

Cheers,

Philip Clarke

Hi Phil,

As we discussed we would like to proceed with the transformer cutout out replacement this year in Natuashish. The budget on the project is \$51,000.00 and a costing sheet is prepared below outlining the expenses anticipated. We have budgeted 120 hour of OT on the project as the intent is to send a crew into the community and work 10-12 hours a day until the project is complete, approx 2 weeks. We are strapped for resources and our schedule is tight but we consider this work important from a reliability and safety perspective so if MIFN approves this capital work we would like to commence in mid to late Sept.

As with all Capital projects in Natuashish, we would like to have the funds up front before we start ordering materials and scheduling the crews. Do you think we could have the funds before the first of August if approved?

Regards,

Rick Kennedy

Good Morning,

Could you provide more information on where to link this in GCIMS? Thanks

Aimie

>>> <p.philip.clarke@ca.pwc.com> 7/20/2017 3:53 PM >>>
To Whom This May Concern:

Please find attached a revised FY17 fuel report. There is no change in volumes...just a change in the time of the price change driven by FIFO accounting rules.

Cheers,

Philip Clarke

Amcon would be ok as they get cash.. Consol No. Less money for them. Would need legal to weigh in. Possible option.

Erika:

I spoke to Jason this morning..INAC advanced \$278,561 to PNL. The invoices they have total about \$210k..they are just reviewing internally and will confirm by early next week.

Cheers.

Yes, there is an allocated capital service extension budget as well as an upgrading capital budget. Like all other capital we would need the money up front (after the technical assessment determines the cost) before we commence.

Thanks Rick. I just spoke to Glenn. He indicated there is a budget for this. Does this get rolled over? The new construction would occur between existing serviced homes.

Hi Erika,

The information on the electrical services required for each home would be the exclusive responsibility of the contractor(s) erecting the homes or possibly the MIFN project managers. Unfortunately, we don't have the means of knowing that until the contractor provides us with it.

Sorry, but as soon as that info is obtained we can assist a tech to the project to determine the cost to provide power to the homes.

Thanks

Hi Erika,

I'm currently on vacation however the best approach is to have whoever is overseeing this project call Hydro's customer service and request a technical assessment on the additional homes in Natuashish. This is very important for costing as well as routing and availability generation (which should be ok). I've cc Glenn O'Brien in this reply as he is the Manager of this department, if you have any further questions he would be your contact until I return on the 11th of July.

Thanks
Rick

I think this is a solid start and has almost all elements we'd require. We can look at pulling out key criteria and breaking it out further with program needs in mind.

We need to tie in what we want (can legally do) re Nalcor.

Hi Erika.

Please see attached the information we provided to former Chief Gregory Rich. The offer of services outlined an approach we felt would be most effective at attempting to address some of the issues and concerns we heard in previous conversations with both John Higham, as well as Chief Rich and Nick Paradisis. Our approach to this would remain similar. Working with the existing operations staff and leadership towards development of a strategy to address long term issues and concerns. Ideally, this approach would also include INAC to support the logistics of scheduling and budgeting.

We attempted to provide support to the community leadership on the boilers at the school, as well as training and capacity opportunities for a few of their support staff.

Nick reached out to Mark last night to discuss the approach we outlined in our original meeting. They have scheduled a conference call for next week.

If you have any questions or would like additional information I would be happy to give you a call.

2015

Mushnam - Co-manager Meeting

Date Sept 11, 2015

FN

ATK/AC

Kevin / Phil Co-manager's / Bill
HC PWC CFO

Band Manager - appears to have some authorities suspended

- last week of Oct for sea-1, ft.

- General overview of reports → additional effort will be needed to develop an understanding of what would be needed to address all the issues.

- Replacing the sand in the filters is the highest priority to prevent interruption in service this winter; late delivery of the sand will increase the difficulty in handling under freezing.

- Advised the Captain was made aware of the need for sand and was going to order for this year.

- Electrification regulated @ 7/kw in Mushnam, 80/kw (702)

- Catighan - meeting next week to review agenda.

2404/hr - 1" x 1" x 1" unit/generator

2 tonnes/day - 1 ft³ generator

150L/day/captain in UK

20 tonnes/hr → large units @ 0.5m pounds.

- Flue system: i have not validated the effectiveness only based on eye witness experience.

1/45

Mushman

Date Sept 17/15

AANDC - Melham/Kris

MCFN - Phil + Bill

MIFN

AANDC

- No meters readings ; not all buildings have meters; no meter billing.

* MIFN estimate based on Davis Inlet use

- AANDC pays for generator fuel only

- Fuel is meter & slips are generated,

→ using the unregulated rate

MIFN

All housing ⇒ Housing heating Fuel = \$211,290.⁹⁵

of MIFN persons residents = 215

* Avg cost per resident = $\frac{\$98.75}{?}$ * not possible \$120/L

Whitehorse K duplex = \$2,000/year - 2,500/year @ 98¢/L

- attempting to get the utility under the regulation of the Public Utility Board.

- NHL against placing under Public Utility Board.

MCFN - Going to forward the invoices for the work in dispute to ensure if a recovery is done; that AANDC does not over pay to NHL.

NHL - \$50K to do an asset assessment.

* Will attempt to come to mutual agreement on the \$ that should be paid to NHL - All parties agree to complete in week.

Questionable configuration of the Fire hydrant. Deputy Fire Chief understands that fire hydrant is located directly on top of the water main and in order to isolate 2 valves on the main versus the typical offset with valve.

When the hydrant is turned off (2 valves on main) sections of the water main loses water which should not happen as the water distribution system is designed and "built" to have all main loop. This would always ensure 2 points of flow into each looped section water main.

IF water services is lost when hydrant is turned off; then there is a risk that other valves in the distribution system are closed. Deputy Fire Chief explained that valves were checked and all valves were apparently opened. Further assessment is required to determine cause.

Page

3/45

Date

In the last several months; the water plant has experienced several power surges that disrupts the limited automation and operators ~~and~~ are now operating components in manual vs automated. Increased burden on operations. Sand filters almost overflowed because the wells continued to pump; but the automated valve for the underdrain was closed; ~~the~~ sand filters came within 2 inches of overflowing.
→ lack of communication + SCADA increased this risk; would have turned off wells.

Discussion of letters

- verify if \$1.9M is actual dollars in MCFR bank.
- Explained purpose of letter and explained ATNOC support for advancing working group
- Explained similar process is being undertaken in Chapel Island
- Will forward Chapel Island Committee chair for Chief + Council review.
- Will require formal commitment from Chief + Council to advance working group's work plan.
- Advised that process would likely take a minimal of 2-3 years resolve issues - best case.

Date

Finances - replaced 3 finances to date

Chief - long-term replacement of the finances
(transfer to consider funding) as it is thought that the finances
life is 13-15 years.

Deputy chief - Finances should be enclosed in a
fire rated room (8hr) - need to check
what the 202 fire code/building code
requires.

Catlyer - Air exchanger works off of the
blowers for the finances and many of
the blowers do not work.

Davis Inlet Decommissioning

Chief wants to advance the discussions
- look at the submitted budget that
has already submit - see previous
proposal

- chief does not feel Band can afford
costs associated with developing ~~the~~ or
negotiating the MIRA.

chief - wants to start work for next summer
- buildings are being taken apart - safety issues
- " " are also being burned down.
- wants process in place to avoid this
project from being stalled/delayed further.

Kerr - advised that runway decommissioning is under the
airport agreement. Need to re-familiarize with
terms of both Agreements.

Page

5/45

Date

- Housing - overcrowding
- 30 births / year
 - 212 houses; 920 residents (4.25/house)
 - Support from AANDC to build houses
 - May need to review previous reports on the housing inventory
 - long term - future need + existing stock

* ~~Band Manager~~

AANDC - wants to know what the breakdown of OAM and capital under the Grant funding from AANDC + is isolation factor into the funding

- rationale for the allocated funding
 - concern over lack of trades for water and wastewater (electrician + mechanical/plumber)
 - mechanics for garage → typically only 1 on duty at time → health and safety need another employee
 - need 2nd person for fuel delivery as he is alone at tank farm - support
 - garage door needs replacement - at public works garage
 - heavy equipment gets damaged because left outside → need more secure storage perhaps building.
 - need to get maintenance supplies for the heavy equipment → need storage area

funding to cover the cost

IRT - De-briefing by Chris for Mushuam. Oct 8/15

Meeting with Chief Rich, John Newie, John ?

- Chief was up to date and understood the concerns with the letters.
- Chief going to take back to Council for approval for working groups
- Looking at working groups - Oct/Nov to start discussions.
- Will recover funds for Nalcor
- May need Innu group to keep/address the issues (Innu Team lead)
- Fuel → tanks + pipe
- Housing - was not spoken to in detail; Health Canada is prepared to sign and send to Mushuam.
 - mold / furnace / maintenance
- De-commissioning → Chief going to write to express desire to move forward with MCHT for decommissioning.
 - Will need lead for this
 - AAMOC → funding + closure plan
 - province

Electrification - Public Utilities by end of December; MCHT paying ~~over~~ too much respect to pay lower rates

- Province going to increase rates for Labrador.

15

Date

Finances - assess them / providing Funding

Round Table - Innu

- Arrange presentation to HC + AANDC, DM of the situation today and plan forward.
- Will need lead → start deck.

Tanks were ~~not~~ raised → addressed

- * PAFI - Procell AANDC Funded Infrastructure
 - all ~~new~~ projects will have to be compliant with PAFI

Mushman - Project Team

Brad - Look for short/~~mid~~ medium / long term plans
- what are most urgent → short term

Oona → does not agree that ANAC needs map the entire process
→ go present team and start developing a plan as opposed to ANAC to develop a framework to take to MEFN for discussion

Brad → Re-iterate need to develop a process

Mathieu → Table project team with named participants
→ the strategic document would be separate

Brad → Needs to map the process as to capture opportunities that may scale over to medium or long term solutions

Don → ICA was intended to be used as potential model in which Mushman would be used as trial / First attempt

Page

10/45

Date

Brad - Re-iterate the new approach to community developed - learning and changing the way the region approach → strengthen and enhance our approach.

- Information/gathering from Mushum that would be used to populate the application of the ICA.

Harold - By time ICA is applied many ~~project~~ issues may already be under an approach and care may required as to how an ICA approach may be applied.

Brad - Understood; need to ensure approach is encompassing

* In general → we are going into circles → old way hitting new way
→ getting personal → having

Assembly → "Pissing" match; don't have staff to assign

Brad → struggle on way through this as we develop of these plans → document measurable and process to address to bring to ILCC.

Harold → Purpose of the Nov 4 meeting

Oona → talk about teams and name people from community to participate and manage expectations.

- * We are having a very time understanding that planning and mapping of a process is also an equally important process to

ARC - Mushman Meeting
Health Canada + DOJ present

Dec 15, 2015

Chris - IC A - Integrated Community Approach
for Mushman - community in focus

Christ Debbara meeting with Mushman Chief

1st/2nd week of Jan for formal meeting with Mushman to
discuss the plan for IC A. (Jan 3rd Wednesday)

Recipient appointed co-manager PUCs

- ① Fuel supply - state of confusion by MIFN to manage
- ② Furans - MIFN does not have capacity to prepare proposal
- ③ Financial - MIFN does not have capacity to understand how to resolve
- ④ Furans - lead assessment + basic maintenance
- AMND to take lead

Date

Don - current management Plan is flawed as accounts do not have the expertise for Community Development - operations.

Debra - does not appear that the Chief and PWCs are not on the same page → none seems to understand the accounting for the finances for the program. Uncertain as to where funds are being spent.
→ 2 attempts have been made to build capacity to no success.

Chief wants to consider removing Bill Kungesen.

2 day meeting

1 Presentation of Financial state of affairs.

Presentation to Minors on the state of Affairs with Mushman.

Diesel Electricity Service Conference call
Stacy/Kriss

Dec 16, 2015

Meeting with Rosemary

Dec 18, 2015

- Waiting for Tom to start co-ordination for Region
- Lindsay to co-ordinate → technical to be done by myself
- Expect to streamline Mushman with Tom assigned.
- Decommissioning needs to be straighten out as to role

Staff meeting

Date Feb 29, 2016

Mushuan - Generator Update

March 3, 2016

- Nalcor - emergency plan from their process that can be applied to Mushuan

Turn existing generators - Water plant / River Intake; Sched to shed the load

Community to use discretion in their usage.

FN - Brian / ~~Barrett~~ / Council

Mushwan → Update Diane
Site VRI

March 23, 2017

MEFN → March 14 Nick / ^{Pan} / HC Band + Chief couldn't get flight

Nick → Bell Aliant meeting - power + Band with

→ PID proposal for band width upgrades

→ Housing Symposium → June CHAC / ENAC / Mark Ridge / ^{all} parties

→ CPP → funded by Innu Trust → ready by June

↳ Tom knew, but didn't share

→ Hotel → ENAC funded to put proper guards

Diane → Mont MAP items he back to Infrastructure.

→ 2 weeks April + May → Summer may be limiting

→ Tom to get Innu Group started as a priority

Kriss → Band needs to take ownership; if MEFN can't make time to make this happen then it will fail

March 15 → MAP review with Chief + Council

→ TOM supports increased communicating internal

→ House vandalism → renovate

→ HC health plan → Final Notice since 2007 → \$75 K / yr to get plan together

→ New hotel → Geo. Dev. leading

→ ~~Mark~~ Bill → end of March

Default Management - HQ process for Capital Defaults Date April 12, 2017
Sask. → INMAC inspects each year that H+S are addressed
as reported → ARCs

B.C. → proposal based + Needs to address H+S first - capital
issues not operational

- DAT → if determined that FM is in default than MAP actioned
↳ How does this trigger; has to be evidence based and
what thresholds have to be obtained that allows an
acceptable level of confidence to defend the decision
of default
→ Capital assessment tool does not capture the lack of operations
or lack of evidence in application of policies, etc.
- GA → Does ^{not} capture H+S to trigger or substantiate default and
HQ acknowledges that this is a gap and needs to be addressed
- HQ → will be follow-up on available default tools that may support
Region with potentially acting on default

Tom
Mike
Diane
Kris
Philp
Mushna - Map INMAC discussion April 19, 2017
- AROC - need to rate facility → consistent between HQ
2 - Mamm 9-12 Not in money 1 1/2
Site notes 3 - Map
4 - Work group

- Need to ensure Management is aware that the default tool indicates that
Mamm is in default and 3rd party + termination of funding agreement
is required.
- Region may be taken to task if our response or actions are
not reflective of the risk associated with Mamm
- Not sure if Region fully understands risk management and appears
to be more willing to take the less "difficult" path → not likely
going to address the needs of Mushna or address program requirements

Date

Mushman - IRT

June 1 / 2017

PM - required Innu File

→ For all projects → INAC funded / not funded?

Need to address

Chris - support for advancing housing ^{region} needs to determine what the expectations from Mushman is regards to contributing to advancing MAP or any other priority

INAC seems to what to think that things will magically resolve itself - mystery as to why this continues to be the model. Constant disappointment that an expectation of actually getting something done is unreasonable. None seems to know how to actually get something physically done. → produce paper is not a problem → god this is trying! This is painful! I have to get out! Rooney has not reviewed inform + requested an update later after he has time to review. I am surrounded by hard boiled eggs! (2)

Date

18-24 months ECA horizon

Wiale Kim - Mushua Phil → hands

May 10, 2017

902-426-9104

Nalcor

- remote community rates as all other ~~other~~ communities along Labrador
- Sept 2005 draft agreement - schedule "A" only

Kim - Lands Claim advancing → issue from this is the LC is not to include the Generator Plant; Airport; wharf

- MCFN would have to surrender as fee simple to NFLD
- NFLD would have to accept the fee simple surrender
- Until such time as the Lands Claim is resolved

↳ Section 6 - Lands Claim requirement - in

CC → Chris - LC

- Lands - Land Permit
- Funding Services - Blocking funds
- Kim → Legal MCFN

- Make available ENMC's changes to parties
- determine

Canada + MCFN will combine comments when presenting to Nalcor

→ Need to gather Financial background

- ↳ Block funding
- ↳ Mamm
- ↳ Fund/Own funding

→ Kim supports proceeding with process

→ Chris → inform Note after determining Nalcor's support with proceeding after the May meeting

→ there will only help to ~~get~~ prevent further escalating & Lands Claim.

Court will only advise the BLUB as to their authority in regards to MCFN request; LCB will still have to make a decision

Date

May 10, 2017

Wharf:

- MIFN/INAC don't have expertise
- Wharf supports commercial use along with recreation use
- Experiencing deterioration → need to address liability
- Approach NPLD to see if they maintain the other

Airport

- Needs to be updated
- Both require a permit by NPLD → Philp

Chris → initiate Wharf & Airport
→ Letter for Chris

Ken supports Advancing both

- 1) Mushman Tanks - John Olanowski
→ Standing offer for Stattec

Mama school - assessment - June/July complete
- RFP design - Quick fix (Aug/Sept)

ENRAC - Krass/Erika → Are there immediate impact to O&M Agreement?

Kim

Mushman - Duplex

June 9, 2017

- 1090ft. saves on over size costs
- Need contact information for contact in community
- Need to verify ability to produce concrete → mixer size
→ crush material - concrete
- Malax would provide service connection?
- Verify w/w service for lots
- Verify equipment - loader/utility → poles for power service
- dozer/excavator/dump/
- barge unloading area - pictures

KC-Les

Mushman - Tom/Dianne/Jennifer/Andrees

Date June 13, 2017

Explained that Mushman ~~car~~ has not been responsive to INAC's response for support to undertake work.

Len - refused to make his gar't truck available and said he would make one available and then Tuesday morning said he was too busy to make it happen.
- he ~~also~~ explained that he travels to Goma potentially multiple times per week.

Nick - multiple conversations about access to truck & stuff; appears to make not effort and differs to Bill Ferguson
- E-mail requests in advance

Fire - 4" hose on the ground outside Fire hall; parked filled with water

- not prepared to fit fire
- only 2 people showed up for training @ 11:00 AM.

Water Operator - provided 3 answers for the broken hydrant

- 1) Didn't know it was broken
- 2) Was frozen
- 3) Broken and parts are needed.

- advised that Fire Dept. is responsible to maintain the hydrants

Fire - Advised that are not responsible and only assist the Water Operator in maintaining and his boss had instructed him this

Bill - is the only person making an effort to support INAC efforts on-site

General - INAC seems reluctant to do anything other than status ops no matter what happens.

Special AROC - Ennu File

Date June 29, 2017

20 min - Ennu Fire/Finance/Water

Remainder - In Camera

Bill - Fire Summary

- Formalized training program
- truck was not working properly lead to difficulties
- We are lost \rightarrow not addressing underlying causes that contribute

Kris - Water

- Summary of deterioration of water -
- cross-contamination of Rockwell wells by raw water from River & extension wells
- No flow meters
- Sand filters
- Coffer \rightarrow spends all funding on salaries \rightarrow no supplier / governance issue
- Hydrants tested \rightarrow adequate flow / pressure
 - \rightarrow majority require repairs; suggest 50% \approx 50-15000 / hydrant
- Assessment identifying gaps in information & site data that is preventing clear decisions \rightarrow has to be addressed before a complete assessment can be done
- Very little is left to break at the WTP \rightarrow caused stress around the table

Finance

- Did not address needs of study
- Provided no really useful information to advance
- Need to advance as part of overall planning plan

Tom

- Capacity in MRFN & INMAC to advance \rightarrow identified internal resources
- Have had talks with MRFN about 3rd party to run; have not advanced
- Co-management approach needs advanced consideration

Daphne

- Social issues / community issues are seriously hurting community
- \rightarrow 15% construction cost

PCO - meeting the hurdles to delivering Water to FN Date July 10, 2017

Water Authority - Sounds good, but 3yrs no real outcome

Mushman - Chief + Council discussion per Duplexes
- Nick, Len Rich, Tom Rich - Housing Dir
Prote Poken
- Chief Nui

Eric - \$930,322 for 1 duplex; not possible to fund + ship a second duplex to Mushman

- Number of factors have contributed to the elevated costs and it would be important to discuss at next weeks meeting in Goose Bay so Mushman can consider in its future efforts

Nick - Understood what scope can be done

Eric - The remaining funds can be used for renovations for existing housing stock

Nui - Contributing factors for the higher costs?

Eric - Contractor has identify concerns associated with risk when working in community \rightarrow gone in 200-250/m² in NB \rightarrow \$2,500-3,000/m² in Mush

Nick - Contractor to visit Community to see

- Budget gauge

Eric - It's the on-site conditions

Nui \rightarrow Concerned with this information \rightarrow wants to know more

Eric \rightarrow This has been seen in the construction of the store expansion through increased costs \rightarrow

INAC to lift DWA; if Mushman
lifted before repairs → could be
retaining DWA → HC to consider

All participants have joined

Kelvin → working for pumping out of hydrants; type of pump + process.
HC is going send letter to Mushman

Doc. Mayo / Dentist - observed any fluorosis of teeth
- Marion follow

HC wants to start undertaking a more comprehensive sampling
program raw + treated.

Sodium may have to look at p.r. Bill ... on low sodium diets

Federal Meeting Mushuam

Date July 19/2017

- Service Canada is the only party attending
- ACOA / HC / others → not attending

Jan - Existing Reports

- Scrap the sand every year and replenish
- back wash the carbon filters
- Keep records and file (the ones on site)
- Water Utility responsible for hydrants
- Flush the mains + drain the hydrants
- 2006 wells installed at Rockwall & Healing center
- SCADA was there when he was there
- 2006 - When he left; the Carbon filter were due for a change out
- Limicon Filters were used
- water + sewer was under his responsible and not split.
- No problems with lagoon at that time
- Ian used the in-line meters

Lagoon

- Lift Station - Pump run time have increased in duration
- SLS 5 over the past year yet Flow Rate is constant
- large breaks in communication - 1-2 weeks at a time
- Pump 1 - continuous run July 4 - July 19
- Pump 2 - apparent overload → new pump ordered 10-15 years

ATU - continuous run → needs re-programming

Triplex - properly set pic

No alarm set points for SLS 5; SLS 1

blow system pressure decreasing with time 7 → 5.32 ? / losses ?

IWC - MZFN

Date July 20, 2017

HC Kelvin / Kevin
NCH Chief / Council / Nick / Steve Marshall
ENAC Erika / Angela / Dan / Bill / Angela

Andrey - Reviewed Amendments outstanding
44 outstanding reports

Kevin - Reviewed HC report requirements
4 outstanding

Bill - Fire report - Doug Hann
- 3rd party training
- secured used truck from Come River - repaired & shipped
- throttle switch has been fixed? no definitive confirmation
- Action the Emergency Planning Committee from 2 yrs ago
→ apparently this is the all hazard ~~report~~ plan → update 2005 plan/report

Nick - Duplexes - Steve Marshall
March 31, 2018

Full basement ^{in roof}
- integrated solar → can run off grid - all gear including battery back-up 7 Kw/unit
- installed & occupied by Xmas
- Budget price - 3 duplexes - 2 - 2.1 m ^{330K/side}
- lots are ready to construct -
- primary electric heat in-floor / base board.
- put floor 8 1/4" panel well
- foundations of previous building is not there - Chief
- appliances included
- Mlagenism board finish exterior
- Plywood backing for interior walls not included (price option)
- Lexion is not used + Band reform not to and replace as windows are broken (same)
- Hollar shell doors → will quote solid
- HRV included.
- Heat trace controller included → bleedn option
- Electrical to be done by Band.
- Building will be plug + play.

A0454407_33-001566

Date

- on-site to assembly earlier August → start fab.
- pending schedule of ferries + barges. → 60 days
- Based on Goose Bay departure
- 6-7 weeks to construct panels.
- Can provide all - schedule, cost, design by the end of next week

To Stacy:

- Scan mark-up drawings
- Contract scanned
- Tele conference
- Confirm culvert Quantities

Protocol - Col-de-Sac Contract

July 24, 2017

CBCL - Brennan
TNAE - Kriss
PFN - Gerry / Quentin

697 ~~W~~ Windmill Road Parnott

Date

Long to provide ^{HL} contact for flag perso in community \Rightarrow
need to be trained.

Mushman - Pre-meeting
Tom/Erika/Kriss/Angela

Tom feels H&S, hydrants, water treatment may be able accomplish
this year.

Nick + Band don't have capacity to advance the immediate
issues.

Mushman Meeting -

July 26, 2017

HC - Kelvin / Linda

MOEN - Nick

INAC - Tom / Erika / Angela / Kriss

Tom - purpose to follow-up on items missed from Goose Bay meeting
Water priority - Item 1e \rightarrow Health + Safety
2a - All hazard assessment plan - emergency plan

- Look at dealing immediate issues as the overall solution
will require extended time

- May need utilize CBCL for interim measures due to their
familiarity

Nick - Have Billian proposal; would request a description of
the proposed work.

Tom - long-term

Kriss - Cover cost of 3rd party professional fees

Mushman contribute to purchase of materials

- RFA to qualify potential candidates as this is unique requiring
specialized resources.

Date

- Tom - Finance report did not provide sufficient to advance work and no funds available this year. Further follow-up required.
- Mark - Grika to contact Terri to verify boiler replacement
- Duplex designs/costing/schedule to be submitted Thurs/Fri
- Tom - IWG needs to advance; Charter to identify priority tasks
Schedule meeting to advance
- Mark - Will in a position to arrange after people get back from St. Anne → likely 2-3 weeks before meeting can be arranged
- Tom - Will circulate minutes from last meeting for review & approval
- Chief spoke to Water Operators & Cotjen about the importance of ensuring proper operations after meeting in Goose Bay.
- Kelvin - Healing Center water system factored into overall water system
- Kris - HC funded asset; INAC does not fund; wells across From Center are not used → transmission line is only raw water
- Nick 10 days vacation starting next week

Date

80 K SSA Vote 1 - John Mushman

PWC - MIFN Fuel Cost Share

July 31, 2017

PWC - Phil

DWAC - Kris/Erika

- See attached spreadsheet for comments

Potlodek - Water / Read Start-up meeting

Aug 3, 2017

- Advised the FM to apply for construction permit → Quentin will apply to Land officer. Nominal Fee of \$1
- Kris → send EA review approval to Quentin
- Communication → thru PFN (Quentin) or CBCL; ROL not to taken direction from anyone else. → As per previous discussion in initial meeting at CBCL office in Sydney.

- ⑥ Admin
- ⑦ Social
- ⑧ Port Secondary
- ⑨ Band Council / Payroll / Legal / Insurance

PWC → there is no O&M by assets by the Band; tracked as one big O&M single line budget

Reconcile Funding to Electrification → need to verify what MCFN accounts for INAC funding → could be double dipp.

→ Fuel is not accounted by MCFN in INAC Funding
→ Double dipping as paid by INAC in block + then again in the Fuel Amend ment.

INAC total fuel consumption without power generation	210,966.6
Mushuau total fuel consumption without power generation	652,386.2
INAC percentage of fuel consumption without power generation	24.4%

Fuel amendment includes INAC's block funding

MCFN → direct bills the teachers for rent + Mamu pays the teachers
→ 150/teacher/month by Housing to Mamu and mamu deductions from teachers pay.

Muskan - INAC meeting to discuss issues for date
meetings with MCFN on Sept 21/22.

Sept 13, 2017

RDG Chris did not attend this meeting as he has not attended
→ 10/20 appeared

Kim - INAC will define expectations & timelines in which the work
is to be undertaken. Along with the \$ associated with
undertaken the work. Need to avoid issues down the road.

Tom - This will be done → 1st time we discussed

- CTO/Gerry/Alec
CBCL-Mike PFN-Chief/Share Sister

Sept 14,
2017

Meeting with Potlotek & Pilot Plant contractor & Local Water Supp
at the request of PFN.

- Chief & Council asked P.P. contractor to complete installation in order to
show public that something was being done to avoid further
criticism.

CBCL - Summarized the feasibility work to determine that a new treatment
plant is required; summarized effort to look at 2nd Lake.

- Explained examples of other communities that have similar or worst
conditions.

- Technology exists to properly treat the existing source water without
unnecessary high risk.

Water
supplier - Suggested

Alex - started flushing the hydrants from the tower 2 weeks
ago & ran out of water

Mushuam MAP/IWG

Date Sept 20/2017

FNAC - Tom/Erika/Diane/Andrea/Kristi/Angie/Bill Mye

IHC - Kevin/Pam/Kevlin/Sofie

MIEN - Nick + Council / Potter

Chris - All we met and discuss the problems and there seems like there like nothing gets done. Many things need to be done. Acknowledge that community experiences vandalism and youth issue. Appears things are put on paper just to look good. → does not help.

This group should be a team → need to move things forward. IF this process does not change; then this process will not achieve anything.

→ Wants to add Education to the discussion in regards to concerns with current situation with school

Nick - Security Force is top priority to address the vandalism in the community. * Why is MIEN delaying starting this when they could self-fund to start? *

Nick - New communication tower has been erected
- MIEN mail server up and setting up new computers and connection to the increased connectivity. Administration should be connected in near future. Bell has increased bandwidth.

Nick - 3 employees in Goose Bay 2 community staff are working in office and 1 outside.

PWC - Philp Clarke has left PWC + new staff assigned

HR JDs Policies - are not finished
- group insurance plan approved
- pension plan requires HR rep to manage → still working on HR rep.

Date

Chief - NRs for Mou has been sent to legal to review; NRs for wants a public signing between parties in Goose Bay. Date has not been chosen.

Bill - Next week to discuss when training for Fire Department - will require commit by Fire fighters; completely end of Oct. Follow-up in January. Based 2 contractors have not been paid -> 2 months outstanding
 -> Operational inspection will occur when delivered into the community. Why would you do this when it's still in Corner Brook where it is easier? ...

Chief - Oct 15 end date for shipping from Goose Bay.

Bill -> Confusion on whether existing fire truck is fixed or Hattle
 -> Training for fighting fire from within versus defensive fire fighting
 Bill -> March. all emergency plans in place

MAP Review

Mark - Things were relatively slow in community
 - Need to structure a process that can advance more ~~advice~~ quickly acknowledging limitations.

Mark - Will submit Funding Request to attend The Leadership Course in Banff for Chief & Council as this is critical to move out of Co-management. Not sure at existing capacity if this will be as beneficial as there is still no overall plan/detailed plan -> alternate motive?

Endow -> Until a definitive plan is put together that establishes a clear understanding of what is required otherwise just keep spinning fires. I have been hammering a nail for a new focused approach for 2 yrs!!! -> WTF

* Like to know how the H&S & Infrastructure gets captured as all conversation focus on Financial.

Date

Chief - Does not feel PWC is fulfill their duties is
Wick not being met.
Each department is suppose to get budget/expensures/variance

Andrea - Need to work with administration.

Mick - Not seen agreement and not sure what's included;
Diam should be reviewed. * 7-6 yrs into this and only
now having this conversation *

Chief - lawyers to look at what's not being done by PWC
* No conversation on whether there are issues
arising from MAFN.

Kelvin - MAP is the document that is suppose to be
used to guide the Band out of Co-management.

KRIS - Appears to be a conflict as Andrea says a more focused
approach; Kelvin references the existing MAP; MAFN
state as someone who has no experience it
Wants out as soon as possible yet activities in the
MAP will take many years * process is confused *
It does not appear that the Co-manager has not
been working on the MAP -> PWC has stated that
they have not been asked to participate * -> WTF

Tom = back peddling 2 yrs into this??

Items which a 3rd party is leading appears
to be advancing; there require direct INAC &
MAFN involvement is not merging.

Pat -> No staff participating in these meetings so
there is a risk that when Council member do not
get re-elected; then the knowledge is lost. MAFN
should have their own representative (consultant) * I have
* been asking where the administrative staff on their exercise.

Date

Diane will prepare a Scope of Work for an Asset Manager for the community. Will have contractor prepare a plan to address. Will look the urgent.

We have this drafted this and can be quickly dropped

* > Diane is on her own with this
- Preventative Maintenance; budgeting; all inclusive.

* No idea on timeline → throw it together in a week
Diane at 19/11/16 on September 20, 2017

How does this fit into the Co-Manager process

Note → Council needs to know who CBCL is; explained that CBCL has been engaging with Administrative staff. There seems to be confusion that this is not a pelted exercise.

* Micro-managing Also Proto was concern about ~~loss~~ losing knowledge; but not staff present → incredibly poor governance structure and understanding → if everything remains political then nothing moves ahead quickly → their own worst enemy. Mick was aware of this process and at no time was this concern raised.

II - Will forward copy of INAC comments on report to Mick for consideration.

* There is very little opportunity for overall success with the disjointed/confused approach between INAC/MPTM and within INAC + MPTM. Will have to focus the infrastructure - water and let everything else fly in whatever direction people take it.

Not sure if I can take more of this S&S.

Why can't INAC grow a couple and tell MPTM the truth. & Jim Genshew will not likely be made available to MPTM for

43/45

Mushnam - RDC morning MIFN update to RAG

Date Sept 21, 2017

MIFN - Same as Sept 20

INAC - Chris / Nellie / Diane / Griks / Andre / Ron

HC

Nike - PWC claimed that 1000 reports have to be filed to INAC and HC
- Wants to develop additional lots; including all services
water / wastewater / roads / power

Chris - all we do is have meetings and nothing is getting done.
Can't show the people that anything is changing.

Trying to make a difference

Since May → many issues vandalism / break-ins / fires / etc.

People outside community don't understand the problems;
only time INAC is prepared to do something when something
traumatic happens → need to be proactive.

Should live in community for week to appreciate the issues
they have.

School too small; need to expand; expand to get rid
of trailers.

Home need to re-invested - same windows as 2002;
basement unfinished; mould issues.

Patti - reiterated Chris comments for over-crowding

Chris - Lots of confidence in Chief's Council in addressing issue.
We don't have an appreciation of living in Mushnam.
Housing causes social issue; largest issue for PM across Canada.
Raise housing renovation to National attention - Ottawa
Get other departments together to see what kind of support.
Security Force has lots of merit → hear from staff on issues
Mar 26 - will attempt to travel to community.
School assessment underway - building materials; size / population
projects. Chief said day-care removed from the school due to
overcrowding

Griks - School Assessment for both schools; issues - OAM (original design for
ch

Date

Chris -

Andrew - Did agreed that Mushman could look at having
an individual take on the role of Co-Manager and
could ~~to~~ leave PWC and try and individual -
Andrew will assist Mushman in setting up
this.

Diane - Co-manager probably not best way to address Assets
issues; recommend getting a asset manager independant
which would provide co-manager the information they need.

* 2-weeks exit strategy Plan } ENAC to provide
2-weeks asset manager TOR }

Chris - Getting of Co-manager → HC + ENAC are comfortable with
their management of \$ from Govt and assets are operating
appropriately

* Managing exit strategy to diagram to outline process
Next summer should be a highly successful transition year
based on "on" efforts to advance exit strategy

→ Managing Expectation → ???

- Water system is a top priority of ENAC as critical infrastructure

Nick/Chris - ~~letter~~ letter from MIFN for Decommissioning will be sent *
to ENAC next week.

Chris - Everything will be on the diagram → WTF is the MAP for!!!
2 years in and now a re-write → WTF is ENAC doing!!!
- re-iterated the need for Security Force.

Sarson, Kriss (AADNC/AANDC)

Date

- Shin follow-up with serving defendants
- Stanke follow-up with deficiencies
- Stanke instructions
- Next meeting Mar 13th for update

does not pertain to Mushman

Mushman - Project Team

Brad - Look for short/~~medium~~ medium/long term plans
- what are most urgent → short term

Oona → does not agree that ANAC needs map the entire process
→ go present teams and start developing a plan as opposed to ANAC to develop a framework to take to MEFN for discussion.

Brad → Re-iterate need to develop a process

Mathieu → Table project teams with named participants
→ the strategic document would be separate

Brad → Needs to map the process as to capture opportunities that may scale over to medium or long term solutions.

Don → ICA was intended to be used as potential model in which Mushman would be used as trial / First attempt.

Page 10

Chapel - Mike update phone call

Date Dec 2, 2015

Kris - Clarified that CACL will issue minutes from last meeting

M/K - not received update from CRTP + Potlatch for sampling program

K → advance sampling sheet to trigger parties to discuss sampling

Mike - awaiting membrane quote for cost + delivery time
- PLC awaiting cable to reviewing programming for distribution pumps

Mushman - Electrification Grenacher Maintenance Dec 7/15
Conference Call

AANDC - Lindsay / Kris / Rosemary / ^{Phil} / Mathieu

PLSC - Jim / Andrew

\$3K - PLSC \$7K - AANDC - SAS for 3rd party consultant

Rose - Assessment by end of March

Jim/Rose - writing Experience → work with 3rd party to develop scope

Rose → Will review and approve draft scope of work for phase 1 + 2 (potentially)
→ Does not appear that we do not have an understanding of what we are looking for.

Date

B.C. Region - ARC representative
Anca Nastase →
district Engineer →

- provincial → license of occupation - lease 99 yr
→ provincial/federal + private.

Cost share is utilized frequently

Cost Effective → 1st option ; will go to other

Mushman Project Team Meeting

Dec 14, 2015

ARC - Mushman Meeting
Health Canada + DOT present

Dec 15, 2015

Chrs - ICA - Integrated Community Approach
for Mushman - community in focus

Christ Debora meeting with Mushman Chief

1st/2nd Brief of Jan for formal meeting with Mushman to
discuss the plan for ICA (Jan 3rd Wednesday)

Recipient, appointed co-manager PWCs

- ① Fuel supply - state of confusion by MIFN to manage
- ② Finance - MIFN does not have capacity to prepare proposal
- ③ Financial - MIFN does not have capacity to understand how to resolve
- ④ Finance - lead assessment + basic maintenance
- ARND to take lead

Staff Meeting

Date Feb 29, 2016

Mushuan - Generator Update

March 3, 2016

- Nalcor - emergency plan from their process that can be applied to Mushuan

Turn existing generators. - Water plant / River Intake; Sched to shed the load

Community to use discretion in their usage.

Mushman - 2016/17 Capital Projects conference call

August 9, 2016

Fuel Tank + Water Assessment

- Fuel tank - Mushman requested pipeline to be inspected to determine if it can be repaired
- Advice will see if this fits within scope of the approved funding + get back to Mushman
 - Will also determine what room is available in this year's scope with Stantec.
 - Reviewed scope for determining compliance with the new Tank Regulations.

Water Assessment - To address the outstanding deficiencies with the treatment system SCADA; Aeration wells

- Pending when works starts; we may not be able to get any physical work completed this year → assessment + design hopefully for 2016/17 funding year

Date

- need all documentation associated with water system
- Colleen to get drawings back from consultant
- Will be ~~back~~ in Community pot

Potlatch - Sewer / Road upgrades

August 12/16

CCL - Brennan / Kelly

Potlatch - Quentin

INAC - Kross

Mushman - Conference Call

Date Aug 25, 2016

IMAE - Tom / Mathie / Kros
Mush - Nick / Bill did not attend.
HC -

St. John's met with Connie River - preliminary discussions → follow-up meeting to get into details

* Map process of starting the Recommendations
→ to Nick 1 week in advance of meeting to review before presentation to Council

* Requested discussion for the need for organization structure - roles & responsibilities in order to support the MPPA

* Send agenda and allow participants to determine their travel

North Shore - ARCS

August 25, 2016

Exp / North Shore

Look at expiring ICMS for 2016/17

s.23

Staff Meeting

Date Sept 6, 2016

Sept 12, 2016

Payntall - Capital Projects

Sept 13, 2016

ZMC- Brike/Kris

Pa - Dattena/Chris/Darrel

- Review RFP requirements for C.C. + WWA + to-play
- Provide RFP + contracts + consultant list.
- Reviewed scope with consultant + requested proposal

Staff Meeting

Sept 14, 2016

Potlatch - ICA

Date March 14, 2017

- Geo Development - Development of long-term plan
- Tourism - trails
- workbooks / services → how to deliver.

Payback - 6-plex / ~~Math~~ Community Center

March 15, 2017

Dora - Mathew / Mathew

INAC - Erika / Kriss / ~~Dore~~

FN - Brian / Barrell / Council

Mushuan → Update Diane
Site V Rit

March 23, 2017

MEAN → March 14 Nick / ^{Pam} / HC Band + Chief couldn't get flight

Nick → Bell Aliant meeting - tower + Band width

→ PFD proposed for band width upgrades

→ Housing Symposium → June CMC / INAC / Mark Ridge / parties ^{all}

→ CPP → funded by Innu Trust → ready by June

↳ Tom knew, but didn't share

→ Hotel → INAC funded to put proper guards

Diane → Most MAPP items tie back to Infrastructure

→ 2 weeks April + May → Summer may be limiting

→ Tom to get Infra Group started as a priority

Kriss → Band needs to take ownership; if MEAN can't make time to make this happen then it will fail

March 15 → MAPP review with Chief + Council

→ TOM supports increased communicating internal

→ House vandalism → renovate

→ HC Health plan → Final Advice since 2007 → \$75 K/yr to get plan together

→ New hotel → Geo. Dev. leading

→ ~~Mark~~ Bill → end of March

Default Management - HQ process for Capital Defaults Date April 12, 2017

Sask. → INMAC inspects each year that H+S are addressed
as reported → ARCs

B.C. → proposal based + Needs to address H+S first - capital
issues not operational

- DAT → if determined that FM is in default than MAP actioned
→ How does this trigger has to be evidence based and
what thresholds have to be obtained that allow an
acceptable level of confidence to defend the decision
of default

Not
Mushman

→ Capital assessment tool does not capture the lack of operations
or lack of evidence in application of policies, etc.

- GA → Does not capture H+S to trigger or substantiate default and
HQ acknowledges that this is a gap and needs to be addressed

→ HQ → will be follow-up on available default tools that may support
Region with potentially acting default

Mushman - Map INMAC discussion

April 19, 2017

- AROC - need to rate trusty → consistent between HQ

2-Mam 9-12 Def in moving 1 1/2

Site notes 3-Map

4-Work gray

- Need to ensure Management is aware that the default tool indicates that
Mam is in default and 3rd party + termination of funding agreement
is required.

- Region may be taken to task if our response or actions are
not reflective of the risk associated with Mam

- Not sure if Region fully understands risk management and appears
to be more willing to take the less "difficult" path → not likely
going to address the needs of Mushman or address program requirements

Date

Mushuan - IRT

June 1 / 2017

PM - required Innu File

→ For all projects → INAC funded / not funded?

Need to address

Chris - support for advancing business ^{region} needs to determine what the expectations from Mushuan is regards to contributing to advancing MAP or any other priority

INAC seems to want to think that things will magically resolve itself - mystery as to why this continues to be the model. Constant disappointment that an expectation of actually getting something done is unreasonable. None seems to know how to actually get something physically done. → produce paper is not a problem → god this is trying! This is painful! I have to get out! Rooney has not reviewed inform + requested an update later after he has time to review. I am surrounded by hard boiled eggs! (2)

PCO - meeting the bundles to delivering water to FN Date July 10, 2017

Water Authority - Sounds good, but 3 yrs no real outcome

Mushman - Chief + Council discussion for Duplexes
- Nick, Len Rich, Tom Rich - Housing Dir
Pete Poken
- Chief Nui

Eric - \$930,322 for 1 duplex; not possible to fund + ship a second duplex to Mushman

- Number of factors have contributed to the elevated costs and it would be important to discuss at next weeks meeting in Goose Bay so Mushman can consider in its future efforts

Nick - understood what scope can be done

Eric - The remaining funds can be used for renovations for existing housing stock

Nui - Contributing factors for the higher costs?

Eric - Contractor has identify concerns associated with risk when working in community \rightarrow concrete is 200-250/m² in NB \rightarrow 2,500-3,000 m² in Mush

Nick - Contractor to visit community to see

- Budget gauge

Eric - It's the on-site conditions

Nui \rightarrow Concerned with this information \rightarrow wants to know more

Eric \rightarrow This has been seen in the construction of the store expansion through elevated costs \rightarrow

Date

NRK - pu-fabbed

Eric - Design has addressed issues experienced in the Florida homes; specific environmental conditions; and improvements to structure to minimize ~~top~~ maintenance.

Xlin → local hire possibilities

Eric/
Xlin - Band to put together list of potential citizen's
for employment
- May be able to charge back for any community

Hd. Assistance for Labrador

Date July 17, 2017

Re: Lynsay/Julie Ther

RFQ for long-term stabilizing water systems.

Look at RFP after RFQ + then Charter to implement.

Outlook - meeting Monday morning.

Collaboration - for Doc's Julie to setup.

Michelle - to upload CIAM# into Collaboration

Health Canada conference Call 10-11 A.M. July 19, 2017

1-877-413-4788

(1) Anti-freeze in Hydrants (2) Chemical Water Tests (3) Community Water Source
Alert July 14, 2017 - 2.1mg/L Healy Lodge
2.7mg/L Band Office

INAC to lift DWA; if Mushman
lifted before repairs → could be
rotating DWA → HC to consider

All participants have joined

Kelvin → working for pumping out of hydrants; type of pump & process.
HC is going send letter to Mushman

Doc. Mayo / Dentist - observed any fluorosis of teeth
- Marion follow

HC wants to start undertaking a more comprehensive sampling
program raw & treated.

Sodium may have to look at p.r. E.L.L. on low sodium diets

Field Meeting Mushman

Date July 19/2017

- Service Canada is the only party attending
- ACOA / HC / others → not attending

Jan - Existing Reports

- Scum the sand every year and replenish
- back wash the carbon filters
- Keep records and file (the ones on site)
- Water Utility responsible for hydrants
- Flush the mains & clean the hydrants
- 2006 walls installed at Rock wall & Hocking center
- SCADA was there when he was there
- 2006 - When he left, the Carbon filter was due for a change-out
- Lagoon Filter: was used
- water & sewer was under his responsible and not split.
- No problems with lagoon at that time
- Jan used the in-line meters

Lagoon

- Left Station - Pump run time have increased in duration
SL55 over the past year yet Flow Now is constant
- large breaks in communication - 1-2 weeks at a time
 - Pump 1 - continuous run July 4 - July 19
 - Pump 2 - apparent overload → new pump ordered 10-15 years

After - continuous run → needs re-programming

Triplex - properly so pic

No alarm set points for SL55, SL51

Now system pressure decreasing with time 7 → 5.32 ? losses ?

Date

- on-site to assembly earlier August → start fab.
- pending schedule of Ferrier + barges. → 60 days
- Based on Goose Bay departure
- 6-7 weeks to construct panels.
- Can provide all - schedule, cost, design by the end of next week

To
Stacy:

- Scan mark-up drawings
- Contract scanned
- Tele conference
- Confirm culvert quantities

Lotak - Col - de - Soc - Conf. List

July 24, 2017

CBL - Brennan

ENAE - Kriss

PFM - Gerry / Quentin

697 ~~W~~ Windmill Road Dartmouth

Date

Long to provide ^{HR} contact for Hays person in community
need to be trained.

Mushman - Pre-meeting
Tom/Erika/Kriss/Angela

Tom feels H&S, hydrants, water treatment may be able accomplish
this year.

Nick + Band don't have capacity to advance the immediate
issues.

Mushman Meeting -

July 26, 2017

HC - Kelvin / Linda

MOCA - Nick

INAC - Tom/Erika/Angela/Kriss

Tom - purpose to follow-up on items missed from Goose Bay meeting
Water priority - Item 1e → Health + Safety
2a - All hazard assessment plan - emergency plan

- Look at dealing immediate issues as the overall solution
will require extended time
- May need utilize CBCL for interim measures due to their
familiarity

Nick - Have Billian proposal; would request a description of
the proposed work.

Tom - long-term

Kriss - Gen cost of 3rd party professional fees

Mushman contribute to purchase of materials

- RFA to quality potential candidates as this is unique requiring
specialized resources.

Date

80 K SSA Note 1 - John Mushman

PWC - MIFN Fuel Cost Share
PWC - Phil
DNAC - Kris/Erika

July 31, 2017

- See attached spreadsheet for comments

Potlatch - Water / Reed Start-up Meeting

Aug 3, 2017

- Advised the FM to apply for construction permit → Quentin will apply to Land officer. Nominal Fee of \$1
- Kris → send EA review approval to Quentin
- Communication → thru PFN (Quentin) or CBCL; ROL not to taken direction from anyone else. → As per previous discussion in initial meeting at CBCL office in Sydney.

Mushwan - INAC meeting to discuss issues for date
meetings with MCFN on Sept 21/22.

Sept 12, 2017

RDG Chris did not attend this meeting as he has not attended
→ 10/12/20 appeared.

Kim - INAC will define expectations + timelines in which the work is to be undertaken. Along with the \$ associated with undertaken the work. Need to avoid issues down the road.

Tom - This will be done → 1st time we discussed

- CIO/Gerry/Alec
CBC-Mike PFN - chief/Share Sister

Sept 11, 2017

meeting with Polltek + Pilot Plant contractor + Local Water Supply at the request of PFN.

- Chief + Council asked P.P. contractor to complete installation in order to show public that something was being done to avoid further criticism.

CBCR - Summarized the feasibility work to determine that a new treatment plant is required; summarized effort to look at 2nd Lake.

- Explained examples of other communities that have similar or worst conditions.

- Technology exists to properly treat the existing source water without unnecessary high risk.

Water supply - Suggested

Alex - started flushing the hydrants from the tower 2 weeks ago + ran out of water

Communiqué en vertu de la
Loi sur l'accès à
l'information

BOIL YOUR WATER

ATTENTION RESIDENTS OF _____

As of _____ the community water supply is not safe to drink.
Please read this notice for important health and safety information!

***Any water that
is going to touch
your mouth must
have been boiled.
Cool water before
using.***

People using the community water supply must
boil their water first.

- Water must be brought to a full boil for at least one full minute if you are going to use it for any of the following: drinking; cooking; making juice, drinks or infant formula; brushing teeth or soaking dentures; washing fruit and vegetables; making soup, tea or coffee and making ice cubes.
- DO NOT drink water from a public drinking fountain. It has not been boiled and it is not safe.
- DO NOT bathe infants or toddlers in any water. They may accidentally swallow the water. It is recommended that you sponge bathe infants and toddlers during the Boil Water Advisory.

If you or anyone you know becomes ill with diarrhea or stomach pains, seek medical care immediately.

***Boil your water until you receive official notice
that this is no longer required.***

Use water that
has been boiled for:

Drinking

Cooking

Making juice, drinks
or infant formula

Brushing teeth or
soaking dentures

Washing fruit and
vegetables

Making soup, tea
or coffee

Making ice cubes

You can continue
to use regular
tap water for:

Hand washing

Washing dishes

Bathing, except
infants and toddlers

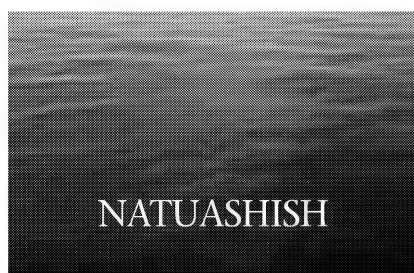

Laundry

For additional information, contact your Health Centre
and/or Chief and Council

DEVELOPMENT OF THE WATER AND SEWER SYSTEM, NATUASHISH, NUNATSIAVUT

The Mushuau Innu (People of the Barrens) settled in Utshimassits (Davis Inlet) on Iluikoyak Island, Labrador in 1967. The circumstances surrounding their settlement are unclear, however, Davis Inlet proved to be an unsuitable site for a permanent community. The Mushuau Innu were unable to access productive hunting, fishing and trapping grounds on the mainland for some five months a year during the freeze-up and break-up of the ice, and the virtual absence of alternative economic activities resulted in a very rapid decline of the socio-economic fabric in the following years.

For many years the Mushuau Innu sought a better community and life and in the early 1990s the idea of relocating to a place known to the Innu as Natuashish was revived. In 1993, the Mushuau Innu, at a population of 500, voted overwhelmingly in a community referendum to relocate. Natuashish was to be constructed on the mainland of Labrador, approximately 15 km west of Davis Inlet at a traditional hunting, fishing and trapping site of the Mushuau Innu.

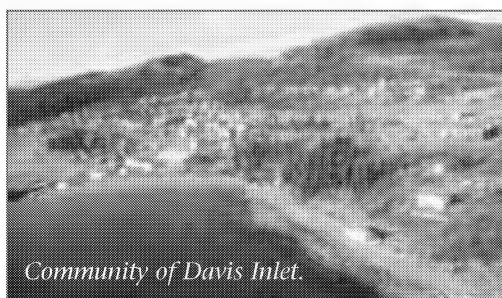

Natuashish community.

Natuashish was to be constructed on the mainland of Labrador, approximately 15 km west of Davis Inlet at a traditional hunting, fishing and trapping site of the Mushuau Innu.

Between 1992 and 1995, the Mushuau Innu, in collaboration with the Department of Indian Affairs and Northern Development ("DIAND") conducted over 40 technical and socio-economic studies. In November 1996, the Mushuau Innu, Government of Canada, and Government

of Newfoundland and Labrador signed the Mushuau Innu Relocation Agreement ("MIRA") to relocate the Mushuau Innu from Davis Inlet to Natuashish, a community yet to exist. Design and construction began in 1997, with the new community including many project elements: community and service roads, water and sewer system, airport, wharf, power generation and distribution system, fuel transfer and storage system, telecommunications system, landfill, housing, school, nursing clinic, band council office, store, school, fire hall, maintenance garage, police station, and recreation facilities.

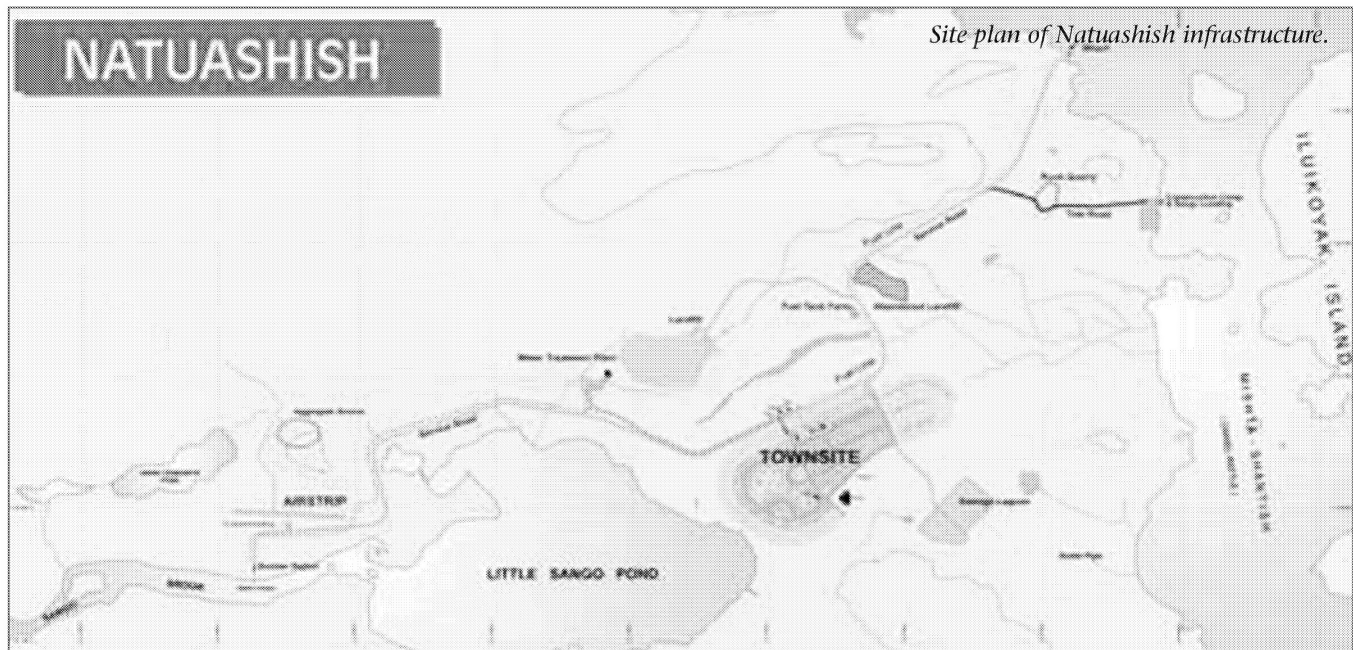

Municipal servicing for Natuashish was initially studied as early as 1992 via a feasibility study that compared the redevelopment of Davis Inlet to construction of a

Community of Davis Inlet.

by Roger Butt, P.Eng., AET, Project Engineer
 Rutter Engineering and Automation Inc.,
 Clarenville, NL

NATUASHISH

new community. Once the latter alternative was chosen, numerous studies were commenced to further evaluate and define the new community, including community planning, heritage, archaeological, geotechnical, environmental, mapping, etc. A detailed municipal services study was completed in 1995 and included the development of design criteria, field programs, correlation with other studies and evaluation of alternatives, culminating in recommendations for water supply and distribution, as well as sewage treatment, collection and disposal. Establishing design criteria was critical for evaluating alternatives, as well as future concept and detail design.

A review of published, recommended and empirical data was undertaken with the objective of determining population forecasts, water supply demand and sewage flow rates.

Population projections were completed using multiple models that accounted for the three (3) components of population growth: fertility, mortality and migration. From this a 20-year population forecast of 1100 persons and a 50-year forecast of

2300 persons was projected.

Water supply demand and storage design criteria included an assessment of domestic demand and fire protection. Domestic demand recommendations included 225 litres/capita/day (l/c/d) for consumption, a maximum day factor of 2.5,

and a peak hour factor of 4.0. The long-term capacity of the distribution system was recommended to be 60 litres/second (l/s), and the 20-year and 50-year storage requirements were recommended to be 340,000 litres (L) and 810,000 L, respectively.

GLOBAL PERSPECTIVE.
LOCAL FOCUS.

Providing engineering, project management, and asset management services for almost 60 years.

Offices Across Canada
www.ae.ca

NATUASHISH

Raw water pumphouse.

Sewage treatment facility selection and design was based on the recommended hydraulic and organic loading. The 20-year design criteria was 247,500 litres/day (L/d) for hydraulic loading ("Q"), 82.5 kilograms/day (kg/d) for 5-day biochemical oxygen demand ("BOD₅"), and a suspended solids loading ("SS") of 99.0 kg/d. 50-year values were recommended to be a Q of 517,500 L/d, BOD₅ of 172.5 kg/d and a SS of 207.0 kg/d.

Field programs conducted over the summers of 1994 and 1995 were utilized to review pipeline routes, reservoir/plant location and sewage lagoon sites. Tasks included surveying, soundings, water sampling, water surface profiling, boreholes, test pitting, soil sampling, installation of piezometers and percolation tests. As a result of these tests, in concert with the balance of studies being undertaken, the final layout of major project elements was completed.

Evaluation of potential sources for a water supply considered groundwater and surface sources. The analysis considered geological data, water quality, salt water intrusion, drainage area, ice flow, flow rates, etc. Ultimately, the water supply

included an intake from Sango Brook, located approximately 800 m upstream from Little Sango Pond. Water was to be extracted from the river via a sheet pile

*Sewage collection is
achieved via a conventional
gravity sewer system.
The sewers are buried at a
depth between 2 and 4 m
at a minimum grade
of 0.5 percent.*

intake channel, two (2) deep-buried intake pipes approximately 100 metres (m) long, and a booster station consisting of a concrete wet well and pumping system. The water is pumped 4 kilometres (km) via a

200 millimetres (mm) waterline to the treatment plant.

Results of water sample analysis, evaluation of design criteria, as well as a pilot project, were used to evaluate potential plant designs and treatment methodologies. Treatment and storage is provided by slow sand filtration and an in-ground reservoir. Disinfection is provided by chlorination, with the plant being located at a site whose elevation facilitates gravity feed to the community.

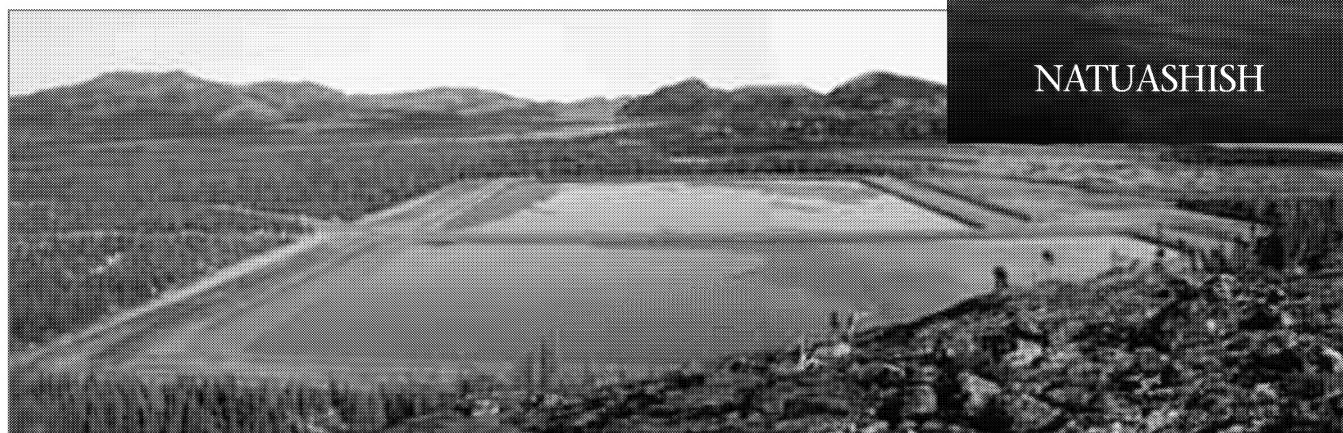

From the treatment plant the water is distributed via insulated watermains of 150 mm and 200 mm diameter, buried to a depth of 3 m. Freeze protection is provided by heat tracing and recirculation, with additional heat added from a waste heat recovery system at the community's generating station. Under normal operating conditions, the heat-tracing is not activated. Freeze protection for individual house services is provided by conventional electric heat trace cables.

Sewage collection is achieved via a conventional gravity sewer system. The sewers are buried at a depth between 2 and 4 m at a minimum grade of 0.5 percent. The sewers and manholes are insulated, but not heat traced. A total of five pumping stations were required for the 20-year design.

The sewage treatment option selected was a facultative lagoon located in an area of poor drainage east of the community

Water treatment plant.

NATUASHISH

Sewage lagoon.

site. The design consists of a two (2) cell lined lagoon with each cell designed for one year's storage of the average daily sewage flow. The land area required for the 20 year design was approximately 17 hectares (ha).

Design and construction of the water and sewer system took place from 1997 to 2002 and was completed via multiple contracts in concert with other project elements. The Mushuau Innu relocated to Natuashish during the winter of 2002/2003. The cost of the new community was approximately \$152 million.

■ THE MOST EFFECTIVE UV DOSE

Two proprietary high-UV-dose, long-life lamps with elliptical reflectors inactivate pathogens from 360 degrees. Flow rate capacities: 6.7 m3/hr (13 US gpm) - 4000 m3/day. NSF/ANSI 55 Class A Certified.

■ RISK FREE AND FAIL SAFE

Two smart UV sensors, mounted in air, constantly monitor lamp performance and water quality. Computerized alarms ensure that only safe water can enter the water management system. Automatic solenoid shut-off valve - if water is running, the water is safe.

■ SELF CLEANING; QUARTZ WON'T FOUL

Automatic quartz cleaning system. No quartz cleaning or system drainage required so no risk of quartz breakage. No water softening required - system can treat water with a hardness exceeding 50 grains (855 mg/l) WITHOUT fouling.

■ VIRTUALLY MAINTENANCE FREE AND SIMPLE TO INSTALL

Lamps are mounted in air. Replacement is easy - no need to drain the system. Compact size and flexible stainless FIP connections for simple installation.

Pure, safe water.
